BABY PIGS NEED IRON
Baby pigs need iron because pigs are born with a small supply of iron in their liver. Sow's milk does not contain iron in sufficient amounts to supply the pig's needs. Baby pigs grow to maturity faster than those that are iron deficient. Iron is a necessary part of a pig's diet. Purina Iron-Plex is the remarkable iron supplement that meets the iron needs of baby pigs. It is a palatable, baby pig like it... start to eat it early... 2 to 3 days of age.
