Questions and Answers

Q--I have just completed my two years active duty. Am I required to join an active reserve and attend weekly drills?

A-- The order to duty, assignment, and release of members of the Armed Forces is not a function of the Selective Service System. It is the sole responsibility of the branch of service of which you have been a member.

Q-- I am classified I-Y and have a child. Will I be called for re-examination?

A-- No. If you have furnished your local board with this information you will be considered for reclassification.

Q-- I was 18 years old in April and have not been classified. I will graduate from high school in June. I have not made up my mind whether I will go to college in September. Under the circumstances will the local board delay my classification until September?

A-- A local board does not base its classification determination upon the intensions of a registrant. If it receives a statement from the college that the registrant will enroll in the fall, it may give consideration to granting a student deferment until that time.

Aspirin is said to be the world's most universal drug, more widely used than any other in medical history. It is a member of an ancient family of drugs known as salicylates which occur naturally in such fruits as oranges, apples and grapes as well as in certain flowering plants. In Greek and Roman days, it was common for people to extract salicylates from willow bark. Hippocrates, the father of medicine, recommended leaves of the willow tree to ease the pain of childbirth. Today, Americans take enough aspirin to provide the entire United States population with two tablets per person each week.

Oranges, the world's leading fresh fruit, were cultivated in the Orient as early as 2,000 B.C. They were introduced to America in 1565 by Columbus. Dolls were popular in America, long before the days of Columbus. Indian tribes twisted corn husks into figures for use in ceremonies and as children's playthings. The first major step toward modern architecture was taken 2,000 years ago when an ingenious Greek invented the "post and lintel" form to support
