NEW FROM PURINA RESEARCH
CHECK-FLY CATTLE BLOCK
Purina research has developed a protein-mineral base cattle block that will kill horn fly and face fly maggots in the fly's rear end, retard egg production and larval development of the common stomach worm, nodular worm, and hookworm and sheep. PLUS...this new cattle block will prevent foot rot and jumpy jaw of the soft tissue of the hoof when fed on a continuous basis. Check-Flly is also available in a concentrate form that can be mixed with sale or mineral. Check with your company dealer for this new, easy way to control flies.

WORM CATTLE NOW
Now is an excellent time to worm cattle before they go on grass. A dollar invested in Purina Worm Kill Checkers can return up to \$6.00 in weight gains, more milk production from beef cows and better condition of breeding stock. By worming cattle you reduce the possibility of disease and parasites. When you worm cattle before they go on pasture you also reduce the build up of worm eggs in the pasture. Use us today for a complete worming program.

BUILD YOUR COWS UP
"One man winter was rough on the stored up vitamin A in dairy cows. You can put your cows in condition for the spring and summer months by top feeding or mixing Purina Golden Bulky in your ration. Golden Bulky is a high quality A and other vitamins and minerals cows need to milk to their capacity."
