THE FAMILY LAWYER

Flunking the Teacher

Pupils who fear flunking may find comfort in the fact that teachers, too, sometimes have similar worries. The public school teacher who fails to meet basic standards of performance may face demotion or dismissal.

Statutory and contractual provisions vary. But a typical question is whether a particular teacher is "incompetent." What does that word mean, when tested in a court of law?

It applies most clearly, of course, to the teacher who simply does not know his subject. A math teacher baffled by math or a history teacher ignorant of history is obviously incompetent for the position he holds.

He is also incompetent if, although he knows his subject, he

lacks the ability to explain it to his pupils.

But there are still other ways, beyond the mere ability to teach the subject, in which a teacher must measure up.

Thus, he must be able to keep order in his classroom without resorting to extreme methods. A woman teacher was held incompetent because she kept her pupils terrorized by cuffing them hard and often. The judge said such tactics "would not even have been tolerated in the days when the hickory stick was my symbol of authority in the classroom."

Also, a teacher must be reasonably cooperative with the school administration. One teacher was held incompetent because he refused to let supervisory personnel into his classroom. So was another teacher who, after collecting money for tickets to school plays, failed to account for the proceeds.

Even a physical handicap may amount to incompetence. A court upheld a charge of incompetence against a teacher who became too deaf to hear recitations—or the profanity that flowed freely in his classroom.

On the other hand, a teacher is not required to be a paragon of virtue.

One teacher would occasionally toss a piece of chalk at an unruly pupil. Incompetent? The court said no. Another teacher chewed tobacco. Again, a court held this was not grave enough to prove incompetence.

Nor does the law condemn a teacher just because his pupils don't happen to like him. As one court said:

"Popularity among pupils does not necessarily prove competency. The ablest teacher may be the most unpopular one."
