Blondie's in love

...with her automatic icemaker!

You will be, too, when you discover the advantages of having one in your refrigerator

Now's the time you need lots of ice for tall summer drinks and now's also the time to forget the mess of filling ice cube trays the old-fashioned way. Forget sloshing, slopping and mopping. With a modern icemaker in your new *electric* refrigerator-freezer, ice cubes form automatically . . . without mess . . . without work. It's easy. Water is piped into the icemaker, cubes form and empty into the storage tray. Quickly . . . more cubes start forming so you have *plenty* of ice cubes on hand . . . but never lift a finger.

See the automatic icemaker at your dealer's soon and while you're there check the other advantages of an *electric* refrigerator-freezer . . . more storage space . . . no defrosting ever. . . . Electric living is the way of today!

THE FAMILY LAWYER

What Price Beauty?

Skin deep or not, beauty is precious to most people. Both men and women, as a rule, are acutely conscious of their physical attractiveness—or lack of it.

So it is not surprising that people hurt in accidents often seek damages not just for injury to their limbs but also for injury to their looks.

Should that kind of compensation be awarded at all? The law's answer is yes. Even though a scar is not disabling in the same way as a limp or an ache, disfigurement can be a real and serious handicap.

The biggest problem lies in deciding how much the damages should be. How do you put a price on the harm done by a scar?

The courts generally take into account both the characteristics of the victim and the characteristics of the scar itself. Thus, in particular cases, the following facts have been given weight to a damage claim:

1) that the victim was a girl, ("scars on the face of a female are ordinarily regarded as more objectionable than on the face of a male");

2) that the victim had a job (as an actor) in which appearance mattered a great deal;

3) that the scar had an unpleasant side effect (distorted a young man's smile).

On the other hand, damages will be less if the scar can be remedied by simple plastic surgery—or if it is in a place where it would not ordinarily be seen.

What if the mere display of a scar to the jury would be shocking or indecent? That could improperly influence the emotions of the jury. Such a display may be forbidden, usually at the discretion of the trial judge.

However, in most cases, the judge will rely on the jurors to draw fair conclusions from what they see.

In one case, involving an injury to a young woman's knee, the defense attorney objected to an inspection by the jury. He noted that the plaintiff was young, charming and beautiful—and that the jurors were all men.

But the court overruled his objection, commenting:

"She is entitled to resort to the same proofs that she might have resorted to if she had been aged, ugly, and repulsive."
