SHORT AND SWEET

What the American woman owes to the free enterprise system is something that is just being fully understood by thinking women ... while at the same time they are beginning to appreciate what a huge part of its growth the free enterprise system owes to them! Out of this realization should come the love affair of the ages, beside which the blandishments of any other system will seem ludicrous!

It has something to do with shucking off outmoded ideas concerning a wife who works; a renouncing of the idea that a husband is shamed if his wife works; an acceptance of the idea that she should work if she wants to, whether for the stimulation of it, or for the extras her paycheck affords.
