September 9 Last Day To Register To Vote

Frankfort -- Saturday, September 9, is the last day for unregistered Kentuckians to register to vote in this year's November 7 election of a governor and other state officials.

Unregistered persons are eligible to register and vote if they will be 18 or older by election day and if they have lived in the state one year, the county six months and the precinct 60 days.

Once you are registered, you do not have to re-register or notify your registration officer unless you move, change your name by marriage or your name has been purged because of failure to vote for two consecutive years.

Eight statewide officials besides the governor are to be elected this year. They are lieutenant governor, secretary of state, attorney general, auditor, treasurer, superintendent of public instruction, commissioner of agriculture, and clerk of the court of appeals.

Also up for election in November are 100 members of the State House of Representatives, 19 state senators, and an undetermined number of candidates for municipal boards, and to fill vacancies that have occured in various offices throughout the state.

Another thing to remember this year is October 19. That is the last day to mail to the county clerk one's application for an absentee ballot for use if he is going to be away from his home country on election day.

Applications for absentee ballots must be notarized and returned to the county clerk by mail so he will receive them before the polls close at 6 p.m., local time, on election day.

Seeding Time

LEXINGTON, KY. -- Alfalfa seeding time will be here soon. Follow well-established rules to get a good stand, says Warren Thompson, U.K. Cooperative Extension Service forage specialist.

The rules:

PLANT EARLY: It takes up to nine weeks of growing time to get alfalfa ready for winter freezes. Seeding made after Sept. 10 in Kentucky have little chance to survive the winter in a vigorous condition. When you seed in July, pick soils free of crabgrass and other late-summer weeds.

INOCULATE THE SEED. Dampen the seed with sugar water (using as much sugar as will dissolve in the water), sprinkle the dry inoculant on the seed and mix thoroughly. If the seed is sticky, add cornstarch, dry skimmilk, wheat, flour, or similar material, so the seed will flow freely. If seeding is not finished in one day, inoculate the seed again.

COVER THE SEED. About one-quarter inch seems to be right depth for average conditions. Moisture, time of seeding and equipment used will affect seeding depth.

SEED FOR A STAND: Use 10 to 15 pounds of seed an acre if alfalfa is seeded alone. Reduce the amount of alfalfa seed if you are seeding with grass. Don't try to overcome late seedings and poor seedbed preparation with a higher seeding rate.) But, most farmers in this state go to 18 to 20 pounds seed an acre as "insurance."

PROPER CARE: Don't graze or mow new seedings the first fall or winter. Harvest the following year when stand is in full bloom.

Tick Can Be Nuisance

Lexington, Ky.---This is the season the American wood tick, also known as the dog tick, can be a particular nuisance.

This pest, kin to the red spider or chigger, is a big pest of dogs

NEW KENTUCKY COLONEL--Miss Imogene Westfall, 378 West Main Street became a Kentucky Colonel this week when Colonel Earl K. Buchanan, commander of the Lexington-Blue Grass Army Depot, presented her the Carlisle resident her commission. Miss Westfall was honored for her outstanding work over the years with various depot sponsored programs in support of community welfare programs. The commission was presented at the commanders staff conference.

But he can also attack any warm-blooded animal, including man, says Dr. Rudy Schellner.

The tick is a common carrier of Rocky Mountain spotted fever, a very dangerous disease, tularemia and others, he notes.

Best way to avoid them; Stay out of woods and fields if possible. If not, use treated clothing or spray repellents. These give some protection.

Removal of the ticks from legs and arms can be a problem. A good part of the tick's head remains in the bite area, a secondary infection can result.

Spray recreational areas of other frequently used wooded or field areas with one of the following insecticides: DDT, Toxaphene, Choloradane, Dieldrin or Lindane. Follow label instructions for safety, mixing and application.

Cub Scout Study

Ten professional leaders of the Blue Grass Council, Boy Scouts of America, will meet on September 11, 12 and 13 at Barkley House, Cincinniti Airport, with Scout Executives of nearby areas to learn of changes in the improved Cub Scout program made after careful research, painstaking study, and field reaction.

In turn local leaders from Carlisle and the Cub Scout leaders at the October roundtable meetings in each of the council's eleven districts.

A research study obtained the best possible knowledge, experience and opinions about the needs, characteristics, and desires of boys of Cub Scout age and their family and group interests and reviewed and appraised current practice in Cub Scouting. The findings were evaluated during 1965-66. The proposed improved program was shared with leaders in 68 meetings across the Nation.

Program changes seek to improve the appeal of Cub Scouting, attract more boys and, hold them for three years, and encourage them to enter Boy Scouting at 11 years of age.

Now a boy eight years of age or in the third grade may become a Cub Scout. At ten he may join a Webelos den and become a Webelos Scout. This phase out Lion.ran by September 1, 1968. A Den Leader coach will train and assist Den Mothers.
