

REVIEWING EXTRADITION PAPERS and official documents is one of the many duties of Larry S. Postle, 27, youthful administrative assistant to Gov. Louie B. Nunn. A native of the Capital City, Perkins claims he never had any idea one day he would be working in the "big building on the hill." His is one of the top positions in the executive branch.

Deaths

Daniel T. Blake, 70, of 3585 Northampton Drive, Lexington, died at 7:15 a.m. Tuesday, Aug. 6 at the Central Baptist Hospital after a short illness. A native of Nicholas County, he was the son of the late Edward and Dottie Gillespie Blake. He was a member of the Carlisle Baptist Church and of the Carlisle Baptist Church and a retired maintenance worker for W. T. Slaten & Co. Survivors include his wife, Mrs. Myrtle Woodie Blake, three sons: Howard Blake, Richmond; Paul Blake, all of Lexington; six daughters, Mrs. Judy Weaver, Mrs. Betty Lee, Misses Mary Blake and Janie Blake, all of Lexington and Mrs. Kessie Roberts, Ashland, and Mrs. Ronald Petrusky, Mt. Pleasant, Mich., and a granddaughter. Services were conducted at 1:30 p.m. Thursday at Rev. R. Brothers Funeral Home by the Rev. Tom C. Nix. Burial in the Carlisle Cemetery.

Radio Amateurs To Meet Aug. 31 in Louisville

Radio amateur "hams" from the tri-state area will meet on Saturday, August 31, at 8 a.m. for the third annual Louisville Ham Convention at the Executive Inn. In recognition of their public service contributions and the Ham Convention, Governor Louie B. Nunn has proclaimed the week of August 25th as "Amateur Radio Week." More than 55,000 in prizes will be given away to hams and others in the Saturday program, including in the form of a \$200,000 prize featuring four world travelers in an arena forum, an amateur radio TV demonstration, a report on

Lime Need Discussed By UK

Amount of agricultural limestone needed on Kentucky farm fields will vary, degree of soil acidity and crop being grown are two important factors, says George D. Corser, U.K. Cooperative Extension Service soils specialist. Soil acidity levels vary from what the scientists call "near neutral," a pH acidity level index of 6.7 or above, down to a strongly acid soil of pH 5.0 or below. Near neutral soils usually do not require limestone for almost any crop, but strongly acid soils will need from two to five tons an acre depending on the crop grown. Soil tests are to be given on strongly acid soils, two or three tons per acre of limestone are needed. For very acid soils, three to four tons an acre, for alkaline or strongly acid soils, four or five tons an acre. Amounts of lime needed are cut down as the degree of soil acidity (pH level) drops to moderately or slightly acid. Soil tests are the only way a farmer can know the degree of soil acidity in a field.

Nismatic Annual Convention August 10-11

The Western Kentucky Club will host the 1968 Annual State Coin Convention August 10-11, at the Jaycee Civic Center in Paducah. There will be over 40 dealers from all parts of the country to buy, sell and trade. Many interesting and unusual exhibits are entered in the competition for trophies. There will be a bid board each day and a penny harvest with prizes of proof sets and silver dollars. At the Awards Breakfast Sunday morning, Dr. Charles J. Loch will speak on "Civil War and Paper Currency." Mayor Robert Cherry will welcome the Kentucky State Numismatic Association officers and all guests of the show at the breakfast. A special display of Civil War Money and Colonial Coins and Currency, courtesy of Chase Manhattan Bank and The Paducah Bank and Trust Co., will be featured at the show. The Kentucky State Numismatic Association will hold their meeting Sunday afternoon at 3 o'clock at the Diplomatic Inn.

Sucker-Stuff!
Liquid Growth Retardant

"Sucker-Stuff" is a new improved formulation of Mastic Hydrozide that controls sucker growth and increases tobacco weight per acre. "Sucker-Stuff" provides control in tobacco with just one application and eliminates the problem of broken and wasted leaves caused by hand suckering. Man-hours saved, greater yield, and improved quality add up to better and easier profits for you.

"Sucker-Stuff" is a product of The Ansell Company—manufacturers of fire protection products, industrial chemicals, and agricultural herbicides.

ETV Ready By Fall

Frankfort -- Kentucky's \$9 million educational television system, which has been under construction for a year, will open on schedule with the public schools in the fall. While the final phases of the production of instructional materials are being completed, both the State Department of Education and the Educational Television Authority are firming up their respective program format for an average 56-hour week broadcast.

Leonard Press, executive secretary of the ETV Authority, reports the system will broadcast each week day from 7:30 a.m. to 10 p.m., with the exception of Fridays when the day's programs will close at 5 p.m. There will be no broadcasting during the weekends.

The broadcasts generally will be confined to public schools use up to 4:30 p.m., when the ETV Authority's programs for the general public will begin and continue through the remaining broadcast hours, according to Press.

Press said the programs definitely scheduled for the general public will be "something for pre-schoolers", which will start around 6:30 p.m., and also programs which will supplement and enrich some instructional programs given in conjunction with classroom work.

For parents who are unable to view the day's classroom broadcasts but will be interested in what the child is being taught, Press said, some of the instructional programs, which will include various subjects, including literature, Press said.

Press added programming for the general public the first year will be flexible, adding "the kind of programs we offer will depend on what the people want."

The academic program for schools will consist of 19 courses for high school and 17 at the elementary level, according to Don C. Bate, assistant superintendent for instruction, State Department of Education. The high school courses—American history and one in the humanities—will receive about 30 minutes of TV instruction and the remaining part of the class period will be left to the classroom teacher, Bate said, explaining, "TV is not supposed to replace the classroom teacher; it is to be only an aid to teaching."

Bate said TV instruction at the elementary level will range from 15- to 20 minutes in each course, which will include science, modern math and foreign language, he said. "We

have scheduled those courses for TV instruction in which teachers generally have said they need help the most," Bate said. 154 of the state's 199 school districts have reported they will receive TV instruction the first year, he blamed the lack of money for necessary school installations as the principal reason all districts won't get on the network this year.

The cost of equipping a school for TV reception, according to engineers, is about \$250 per classroom. This consists primarily of a receiving tower ranging from 30 feet to 70 feet, depending upon elevation, and receiving sets and movable stands, a 22-inch receiver and stand can be purchased through the State Department of Education for \$135, the lowest bid the Department obtained.

Office Closed

The Selective Service Office will be closed the entire week of August 12 while clerk is on vacation, office will be open as usual on Monday, August 19.
