BABSON SAYS--

The coming year threatens to be one of varied and recurring crises. Virtually no area of human activity will be spared--social, economic, political, or international. After years of progress and prosperity, the American people will be faced in 1968 with many decisions that will prove difficult to make and even tougher to carry out.

Don't expect the final solution to 1968's many problems to be worked out during the year ahead. But the manner in which our nation tackles its predicament will determine whether the U.S. will be able to strengthen its position as world leader--or be toppled during succeeding years and reduced to an inferior standing.

To be without hope is to die. And we do have hope that our citizens and their government will rise to defeat the many antagonists--inflation, social corruption, greed, crime, fear, and despair--that are pressing upon us as the new year begins. It is said that the Oriental concept of crisis is opportunity. In that sense, we predict without reservation that 1968 will hold opportunities unlimited for our country.

Now that the pound has been devalued, perhaps our greatest opportunity for the year ahead is to prepare a strong defense for the dollar. We forecast that after some early tumbling both the Congress and the Federal Reserve will move to raise the dollar's price to the equivalent of the dollar's value and production after an early-year surge to new highs for dollar values and production business will find the going rougher

Postal Costs To Reach New High After Jan. 7

New York, Dec. 30--For business establishments and for the general public in Carlisle, it will cost more to use the mails in 1968. It is estimated, based upon the amount they spend for postal services in fiscal 1966, that they will have to spend an additional \$11,200 in the next 12 months.

The added cost, which comes to about 23 percent locally, will result from rate increases recently voted by Congress. The new scale will go into effect on Jan. 7th.

The Post Office Department sought the increase to enable it to reduce its deficit and to make headway with its modernization program.

It estimates that its total revenues will be about \$900 million greater than last year, with the great bulk of the rise coming from first-class mail, which will be six cents an ounce instead of five.

Much of the new revenue, however, will go toward pay increases for postal workers. Coupled with the legislation, also, are provisions for pay raises for other civilian employees of the government and servicemen.

A total of \$48,947 was collected in Carlisle for mail services during the fiscal 1966, reports the government's Bureau of Finance and Administration.

During the forthcoming year, it expects, the total revenue from the local citizens will be obtained by raising the price in stamps will have to be put on letters rather than five cents, that 10 cents will go on air-mail letters instead of eight, and that post cards will be raised to five cents, or one cent more than present.
