## District 30 Masons To Meet July 27

The annual meeting of District 30, comprised of Lincoln, Harrison, Nicholas and Robertson counties which will be held at the home of Mrs. Andrew No. 11, 1149 S.W. 2nd St., Danville, Va., on July 27, 1968, at 7:30 p.m. The meeting will be presided over by the District Master, W. W. Webb, and the District Secretary, Betty J. Anderson. The meeting will be held at the home of Mrs. Andrew No. 11, 1149 S.W. 2nd St., Danville, Va., on July 27, 1968, at 7:30 p.m. The meeting will be presided over by the District Master, W. W. Webb, and the District Secretary, Betty J. Anderson.

## Head Start Staff Presents Program

On Wednesday, July 10, the Nicholas County Head Start staff presented a health program at the Carlisle Elementary School. Nineteen parents were present.  
Mrs. Katie Alexander, R.N., of the Nicholas County Health Center gave an interesting talk on the physical, social and the different immunizations a child must have before he can enter school in the fall, in accordance of the Kentucky Immunization Law.  
Mrs. Alexander said she could see the difference in the child receiving the immunizations as a Head Start, because fear of the shots, etc., was practically eliminated. She said the Health Center was maintained by the tax dollars of Nicholas County citizens and the services rendered are free to each child and that everyone should feel free to take advantage of these services.  
The staff extends sincere thanks to the Rotary Club and the American Legion for free rides and transportation "The Minute Wonderland" at the July 10 festival.  
On July 11, Janice Jett and her puppet friend Jerry of Mr. Oliver, entertained the Head Starters with a program full of fun and laughter. By her skill she was able to gain entrance with the children and they responded to many of Jerry's capers, because fear of the shots, etc., was practically eliminated. She said the Health Center was maintained by the tax dollars of Nicholas County citizens and the services rendered are free to each child and that everyone should feel free to take advantage of these services.

## Smart Accepts Position at Bank

Robert W. Smart has recently accepted a position as Installation Loan Department manager of the First National Bank and Trust Company of Nicholasville. He replaces William K. Brewer of Nicholasville.

## Loans Available

Kentucky college students who have applications for loans pending with the State's Guaranteed Student Loan Program should begin getting their money with a matter of days. Billy F. Hunt, executive secretary of the loan program announced today.

To be eligible for a free night, you must be wearing a jacket, dress, or suit and a hat. The grandstand will be open from 7:00 p.m. to 11:00 p.m. on Tuesday evening.  
The student loan program is expected to have at least \$2,500,000 for lending purposes this year, a slight increase over last year, Hunt said.

## Farm Bureau Fish Fry

The Nicholas County Farm Bureau will hold its annual fish fry on Tuesday, July 23 at the Nicholas County Fairgrounds. The election of officers and directors will be held at 6:00 p.m. and the fish fry will be served from 7:00 p.m. to 11:00 p.m.

**Full Of Mischief**  
TIMMY FOOKS, 7, son of Mrs. Annette Hughes, Miller Station Road, holds his two-month old raccoon pet named "Raccoon." Timmy says she eats a bowl of cereal with sugar and cream each day. Also she likes ham, bacon, and cherry pie. "Raccoon" is brought back to sleep with Timmy sometimes on the couch. Timmy acquired the raccoon when she was only one-day old. While "Raccoon" has been a mischievous animal and had a big dog, then she decided to chew some bubble gum after the ordeal of having her picture taken.

## County Property Valuation Exceeds 41 Million Dollars

Vize, regular member, and Mr. Vincent Harvey, manager, chairman of the committee was not able to attend.

## Local Residents Insured For \$18,387,000

(Special to The Mercury)  
NEW YORK, N.Y.  
Residents of Nicholas County are more heavily insured at the present time than they have ever been. Even though they have better financial protection than they once had, thanks to social security and private pension plans, they have been adding to their life insurance holdings in recent years.  
The explanation given is that the economic position of the average family has improved, enabling it to broaden this form of protection.  
The result is that the capital amount of life insurance in force in Nicholas County has climbed to an estimated total of \$18,387,000.  
This is but one of the ways taken by local residents to safeguard their future. They have also been putting more money into their bank accounts and investments.  
Figures on the subject, for the county at large and for each of the states, are presented in the current Life Insurance Fact Book and in other reports.  
They show that the American people have saved a tremendous sum of money—that in a million cases, "in-life insurance policies."  
Kentucky's share of this total, according to the figures released, is \$15,134,000,000, a big increase over the \$6,050,000,000 reported in 1960.  
Just what does it all add up to at the family level? The findings are that the average family in the state carries an amount of insurance that is equal to 22 months of its net earnings after taxes.

## Pre-Registration

Pre-registration will be held at Nicholas County High School on the following dates between 9:30 and 1:00 p.m.:  
Seniors—July 22, Juniors—July 23, Sophomores—July 24, Freshmen—July 25.

## Returns To Work

Leonard Morris, who was injured July 11, about 12:00 p.m., at a tractor tire explosion, was dismissed Monday from a Lexington hospital and returned to work Tuesday at Southern States Carlisle Co-operative.

## Tiny Ladybug Stands Tall Among World's Heroines

The world's smallest heroine is a quarter-inch-long lady erroneously known as a bug hero.  
The ladybug beetle—Asian ladybird, ladybug, ladybug and ladybug—can gobble up to 50 aphids or other pests in a day. The beetle often lives on the farmer's private army and the soldier's best friend.

## One Quat Clears Field

When the system works, the results are amazing. A quart of ladybugs quickly ate to millions aphids in a Maryland tobacco patch. Millions of grasshopper-destroying beetles (Empoasca graminum) in a Kansas wheat field ate 200 million in 24 hours after ladybugs appeared.

## Big-Eat-Bug Battle

A beautiful variety, the Vedula (Vedula cardinalis) was the first predator imported for a biological war. It gained fame by wiping out the dreaded cottony-cushion mealybug.

## Deadly Scale Appeared in California Citrus Groves in 1888 and, within 20 years killed thousands of trees.

A government entomologist tracked the sawtooth scale to its homeland, Australia. There he noted a Vedula contentedly devouring a scale.  
He shipped 24 Vedulae to California for combat. For 18 months, the beetles did battle with the scale. In the end, the beetles and their descendants saved a multimillion-dollar industry at an importation cost of only \$12,000.  
Since then, commercial firms have scooped up millions of bio-resistant Conover ladybugs (Hippodamia convergens)—the most accessible species in the United States—and shipped them in cold storage to farmers.  
They cost about \$5 for a gallon

of 135,000. Depending on local conditions, it takes from 3,000 to 30,000 beetles to cover an acre. The system has to be used as they fly out.
