

Universities Work On Water Study

Researchers at the University of Louisville and the University of Kentucky are collaborating on an ecological study of areas to be impounded by proposed river dam reservoirs.

A three-month pilot study is now underway, directed by Dr. Louis A. Krumholz, director of the U. L. Water Resources Laboratory. He is assisted by Dr. George M. Simmons Jr., WRL research associate.

Following the pilot study, a reconnaissance project, the main research will extend from 1968-71. Subsequent phases are planned for completion before the dams are finished late in the '70s. Three proposed reservoirs are included: Taylorville on the Salt River, Camp Ground on Beech Fork, and Howardson on Rolling Fork.

According to Dr. Robert A. Lander-

dale, director of the UK Water Resources Institute, researchers from various UK disciplines will join the U. L. teams during subsequent phases. He said the projects, originated by Dr. Krumholz, "will constitute a valuable contribution to water resources documentation and will establish a pattern for future pre-construction research in proposed dam and reservoir areas."

The joint U. L.-UK project will include studies of plant, aquatic and animal life in the areas to be covered by the impounded waters and areas up-and-down areas from the reservoirs. Economic effects on the people living in these areas will be studied and recorded. Studies of water quality in, above, and below the reservoir areas will be included.

Methodist Churches To Meet Tonight

All nine rural Methodist Churches will meet May 2 at 8:00 p.m. at the Saltwell Methodist Church with Dr. Robert Anderson.

Monday, May 6 there will be a county-wide meeting of the Methodist men at the Millersburg C.M.E. Church at 9 p.m.

Hospital Notes

Admitted: Joe Reid, Rev. Harold Rice, Mrs. Edith Shea, Mrs. Anna P. Boone, Mrs. Carl Hall, Tommy W. Duggan, Robert Smith, Miss Lora Jane Flaxer, Carlisle Baby Steven Barbee, Ewing, Callie Smith, Sharpburg, Mrs. Nora Fuller, Moorefield.

Discharged: Sherry Fryor, Freddie Gausse, Ed Bramblett, Baby Donald Glenn Smith, Mrs. Pauline Carmali, Carlisle, Mrs. Ray Wagner, Millersburg, Baby Steven Barbee, Ewing; William McCora, Charles Irovington, Mt. Olivet.

Newton Named K.U. Secretary

John T. Newton of Lexington was elected secretary and treasurer of Kentucky Utilities Company to fill a vacancy caused by the death in Feb. of Elbert D. Adams.

Mr. Newton, who has been assistant secretary and assistant treasurer since 1964, was named at a board meeting following the annual stockholders meeting at which the directors were elected.

A native of Shelbyville, Mr. Newton has been with KU since 1958 and previously was with the Kentucky Public Service Commission and the Campbell County Water System at Ft. Thomas. He is a member of the Lexington Area Chamber of Commerce and the Lexington Rotary Club.

KU President W. A. Duncan told the stockholders that the company's earnings in 1968 are expected to be in the range of \$2.10 to \$2.40 per share. He said that outside financing to the extent of approximately \$105 million will be required to support the \$18.2-million construction expenditures anticipated during 1968 to 1972.

"We expect this financing to be in the form of first mortgage bonds, with the initial issue amounting to \$37 million in 1969 and a second issue amounting to \$28 million contemplated for 1970."

Re-elected as directors were Mr. Duncan, Floyd I. Fairman, Lexington; James Kinley, Owensboro; W. Ernest Milward, Lexington; Earl R. Muir, Louisville; Samuel S. Newman, New York; Spigler R. Ogden, Louisville; Ralph D. Stevenson, Chicago; and A. C. Tuttle, Lexington. More than 84 percent of the shares outstanding were represented in person or by proxy at the annual meeting in Lexington.

Re-elected Mr. Duncan to the board re-elected as officers Harry M. Blanton, Varsity W. Carlisle, A. Clay Stewart and M. W. Whitaker, vice presidents, and A. C. Anderson, controller.

Michael Conley Has Accident

Michael Conley, son of Mr. and Mrs. Joseph H. Conley, fell and cut his head at the Winchester Train Station Tuesday.

He was treated at the Clark County Hospital Emergency Room where he required 14 stitches.

The accident occurred after the Kindergarten Class train ride from Lexington to Winchester.

Beware Anthracnose Infections Warns U.K. Specialist

Lexington, Ky.—The anthracnose fungus has caused losses in most Kentucky areas in plant beds the last few years, says Dr. J. L. Smiley, U.K. Cooperative Extension Service tobacco specialist.

"The fungus is well distributed where tobacco is grown. It occurs in grasses and clovers. It probably gets into the plant bed from turning infested and not properly treated to kill the fungus, or by water that flows over the bed from outside. Well-drained plant beds rated above surrounding ground should be safer than beds on the level," he says.

When anthracnose appears in beds it causes many small spots on leaves, first reddish brown but later papery white-spray or dust the beds with one of several materials: Farnam, five level tablespoons per gallon of water or a 10 percent dust; Zineb, two and one half level tablespoons per gallon of water or a 10 percent dust; or Maneb, one level tablespoon per gallon or two percent dust.

Apply sprays at 100 pounds pressure to leaves coverage on both sides of the leaves. Use a hand-powered crank sprayer for good coverage with dust. Spray or dust two to three times weekly until setting-in.

The disease may be unusually severe in wet weather, and kill large and small seedlings. Plants sometimes have a silvery appearance, with brown, sunken, elongated spots along the leaf and veins, causing leaves to pocket or break.

Farmers Urged To Check Grain Under Credit Loan

Farmers were reminded today to watch the condition of any grain which they have stored on their farms under Commodity Credit Corporation loans.

Freeman Hockenmuth, Chairman, Agricultural Stabilization and Conservation State Committee, explains that the farmer's final return from the crop under loan is based on the condition of the grain when the loan is paid off or it is delivered. Therefore, any deterioration in the grain means to be a loss to the farmer.

Diabetic Children To Camp In August

Louisville—For the third consecutive year a summer camp will be held in Kentucky for diabetic children. The Kentucky Camp for Diabetic Children (K.C.C.D.) will be located at Camp Daniel Boone on the Kentucky River near Lexington. The dates will be August 4 through 17.

Plans for this year's camp were announced recently by the camp committee of the Kentucky Diabetic Association, a group of physicians with special interest in the treatment of diabetes.

Diabetes is a rather mysterious disease. It is not caused by a germ and is not contagious. It does tend to run in families and the tendency to develop diabetes can be inherited.

One of the chief characteristics of diabetes is a lack of insulin action and because of this deficiency, the body is not able to burn its sugar. For this reason, children with diabetes must take injections of insulin one or more times daily. Further, the amount and type of food and the time it is eaten must be carefully controlled, along with the amount of exercise.

This is why diabetic children cannot attend the usual summer camps and why a special camp for them is so valuable. There are 27 such camps in the United States and six in Canada. Some have been in operation more than 25 years. Alumni have said their camp experience was the most valuable in their lives.

35 Years Of Programs To Be Commemorated

Ceremonies to commemorate 35th anniversary of farm legislation and to honor congressional and administrative officials who had part in farm programs will be held Monday May 13th in USDA.

Secretary of Agriculture Orville L. Freeman and Jefferson Memorial Auditorium at 10 a.m. with more than 75 Congressional and former USDA administrative officials as honored guests.

Agricultural Adjustment Act (Triple A) was signed into law on May 11, 1933. First national farm program legislation which is being celebrated has continued to the present.

Secretary Freeman announced that more than 60 Administrative officials and Legislative Personnel and 27 present Members of Congress who were members of the Triple A Staff Conference (1933-4) will be honored.

Emery Clark and Meredith Evans announced Tuesday the sale of the Town and Country Restaurant to Mrs. Christine Sears.

The business transaction was completed Monday and Mrs. Sears took over the operation of the business Tuesday.

Town & Country Restaurant Sold

Under present program procedures, the Chairman points out, the farmer has more responsibility for checking the condition of his crops under loan to see how well they are keeping because fewer inspections are made by the AISC county office.

Should any grain be found to be deteriorating the farmer should notify the county office immediately so that arrangements may be worked out to move the crop. This will save the grain and at the same time benefit the farmer's pocketbook.

Reports Sale

Hazel Swartz and Johnny Lowry report the sale of the Cully Vice farm to Mr. and Mrs. Ewell Lyons of Nicholas County.
