U.K. Ag Engineers Continuing Work On Burley Harvester Unit

MAY BIRTHDAYS

May 2, 1963—The first paid fire department for New York City was established by an act of the State Legislature, replacing the volunteer system.

May 6, 1836—Robert E. Peary, discoverer of the North Pole, was born in Cresson, Pa. On April 7, 1909, he reached the North Pole by traveling the last one hundred and twenty-five miles on ice in five days.

May 11, 1983—one of the largest single benefactions in the history of the world was that of John D. Rockefeller when he gave \$100,000,000 to a group of trustees chartered by the Legislature of New York at the Rockefeller Foundation.

May 22, 1932—the anniversary of the sailing of the steamship "Savannah" was designated as National Maritime Day by resolution of Congress of the United States.

May 28, 1807—Louis Agassiz, who won everlasting fame as an American naturalist and inspiring teacher of science, was born at Motier in the Canton of Fribourg, Switzerland. He was appointed professor of natural history in the Lawrence Scientific School of Harvard University, a chair which he held until his death.

STRENGTH FOR THESE DAYS
 Forgetting what lies behind... we press on toward the goal... (Phil. 3:13).
 The experiences that you may even regrettable take their place in the overall pattern of things we look at in our lives as an emergence out of darkness into light. We never at the end of anything, but always at a place of beginning. Take steps, even small ones, toward the attainment of new goals. Adopt a positive feeling, happy, loving and forgiving. Then begin again.

Also THE CHILLER OF THE YEAR—DANA ANDREWS "The Frozen Dead"

Leavening, Ky.—Work on a "once-over" tobacco harvesting machine—a device that will require only one trip down a row to harvest the plants—continues at the University of Kentucky.

Agricultural engineers hope this year to field-test a unit that will, after years of design, research and prototype building, be the answer. Part of the equipment already has been field tested. J.L. Canada, and P.M. Smith, engineers working on the device, say this year's tests will be on an automatic sick-disposer and a "tilt-stick, lift-out" mechanism; they already have designed and successfully field-tested an automatic operating device.

The present design succeeds an experimental machine built and tested previously. But this design was dropped because it required removal by hand of the lower sick to eight leaves on the tobacco stem before the machine harvested the row. This "two-method" harvesting system was considered unacceptable to burley producers and machinery manufacturers. Thus, the present work was started toward the once-over machine now being built.

The operating device now consists

F.F.A. Holds Annual Banquet
 The National Country FFA Chapter held their annual banquet Friday, May 10 at 7:30 p.m.
 The awards received are as follows: David William Booth and Bobby Judge the Chapter Leadership awards; the Scholarship awards were given by class. Ag. I, Rodney Walton; Ag. II, Paul Tinscher; Ag. III, Lonnie McChabe; Ag. IV, Larry Hatton.
 The total judging team consisted of Larry Hatton, David William Booth, Bobby Judge and Danny Hamilton.

The FFA plaque to the Chapter Star Farmer was received by Larry Hatton. He also received the award for having the highest grades in the senior class and received the De Kalb agriculture award. The honorary Chapter Farmer Degree was received by Donald Miller, principal of N.C.H.S.

Officers Named

The N.C.M. Bowls Barracks and Ladies Auxiliary, W.W.I met at the club room and elected officers for the coming year. The meeting was called to order by Mrs. Juanita McGinley, president, elected for 1968 were: Officer elected for 1968 were: Billie King, president; Mrs. Jane Sorenson, vice-president; Mrs. Arab Lee Sexton, junior vice-president; Mrs. Wanda Sorenson, secretary and treasurer; Mrs. Allie Jones, legislative chairman; Mrs. Juanita McGinley, hospital and welfare chairman.
 Mrs. Mary Lawrence, V.A.V.S. chairman; Mrs. Inez Flora, membership chairman; Mrs. Bertie Cannon, chairman; Mrs. Mary Lawrence, conductor; Mrs. Elberta Hunt, guard; Mrs. Etta Anderson, one year trustee; Mrs. Maggie Hamm, two year trustee; Mrs. Viola Sapp, three year trustee; Mrs. Arab Lee Sexton, pasteuric instructor.
 Mrs. Corda Hamilton, historian; Mrs. Hattie Stone, Americanism; Mrs. Maggie Hamm, Mrs. Louise Livette, Mrs. Margaret Grover, music; Mrs. Ruby King, publicity; Mrs. Elberta Hunt, cards and flowers.
 The officers were installed by the auxiliary president, Mrs. Juanita McGinley. The auxiliary was organized Oct. 10, 1962 by Mrs. McGinley.

Births
 Melissa Lynn and Lisa Ann are the names that have been chosen by Mr. and Mrs. Larry Gray, Bruce L. Carlisle, for their two daughters born Tuesday, May 7, at the Buchanan County Hospital. Mr. and Mrs. Ed Stout are the maternal grandparents and Mrs. and Bill Carlisle are the paternal grandparents. Gray are the paternal grandparents.

Senior Girls Invited To Panhellenic Party
 Lexington City Panhellenic extends an invitation to all girls who plan to enter college in the fall to attend a party at 10:00 a.m. May 25, at the University of Kentucky Student Center. All high school senior girls in the Central Kentucky area are invited to attend.
 The annual affair is to acquaint girls with college life, with worthy rubbing and with facts about national collegiate societies.
 Soft drinks will be served, after which guests will have an opportunity to view displays arranged by the societies having membership in Panhellenic. Betty F. Palmer, the Associate Dean of Students, will give a brief talk.

Two Fall In Attempt
 Continued From Page 1
 his car and drove into Sharpburg for help. Deputy Sheriff Kenneth Hatton and townspeople searched the bank area, but found nothing.
 His wife was with Crown when the men entered their home about one mile from Sharpburg. Both were unharmed,

Hubert Canada, University of Kentucky agricultural engineer, checks over the operation of the mechanical tobacco harvester now being researched at the Lexington campus. The device will be field-tested again this late summer or fall on an actual cutting machine. (DK Coop. Oak Ser Photo)

of eight metal spears mounted radially on a movable turret. When five or six plants have been cut onto a metal spear, the turret retracts, rotates and advances to bring any empty spear back into operating position.
 Elsewhere a wooden stick is attached to the filled metal spear, and the already cut plants are pulled off the metal spear onto the wooden stick by a hydraulically powered arm. The filled wooden stick then is ready to be removed from the harvester. Filled sticks are placed on a wagon towed behind the harvester.
 The engineers say:
 "The machine is semi-mounted to the tractor for good maneuverability. It will handle one row at a time and is designed for a capacity of five to six filled sticks a minute. Only a tractor driver is required to operate the machine, along with a man to receive the filled sticks and place them on the wagon."
 "The University is in this design and prototype development because of the somewhat limited market potential of such a machine. It seemed necessary for U.K. to design and build a prototype which a relatively small manufacturer then could build and sell to farmers. One possibility is that the machine could be used on a custom basis, harvesting done for a price by an owner or bought by several farmers on a land basis."
 When perfected, the machine would harvest a row of tobacco plants in tobacco row. It is estimated it takes one man 14 to 16 hours to hand cut an acre, the machine could do it in five to six hours.
 The harvester is part of the agricultural engineering department's overall research on mechanization of burley tobacco harvesting, handling and curing. One part of this, using "pallets" to hold the trim-cut tobacco,
