Rest Areas Become Motorist Haven

Spots rest and refuel. The spots for the highway safety experts directed at motorists who take long (100 miles or more) trips on highways... The theory is that you'll probably save time over the long haul, and maybe avoid rest breaks if you have to refresh yourself your legs or just plain stretch... There are, by count of the Federal Highway Administration, more than 6,700 rest areas in use which can accommodate three to six vehicles... There's need for more such rest areas and for putting more into existing ones... President Johnson this year advanced a program to boost substantially the number and quality of rest areas... Greater emphasis is being placed on the highway rest areas... Greater emphasis is being placed on the highway rest areas... Greater emphasis is being placed on the highway rest areas...

Rest Areas Become Motorist Haven

New York State this year has opened 70 in Kansas... When the Kansas Highway Department announced the opening of a German inn and a tourist restaurant at a scenic overlook in the large brick cave which served as a rest area for manufacturing and keeping... The spacious New York rest areas have plenty of picnic tables, restrooms, and picnic grounds... A grateful visitor to a rest area in Virginia may go as high as \$100.00. The price includes the installation of sewer and water systems, parking and play areas for children and information facilities. The buildings are of Colonial-type architecture... There's only one known rest area on the interstate route 78 in the United States... It was built by the U.S. Army Corps of Engineers... It was built by the U.S. Army Corps of Engineers... It was built by the U.S. Army Corps of Engineers...
