In Kentucky, one year..... \$3.50  
Out-of-State, one year..... \$4.00

## Bargain Basement Mail

Up in New York state recently, a mail carrier had it up to his ears in delivering sample of mouthwash, detergent, and the scores of other forms of junk mail and outright refuse to handle the stuff any more. Whereupon, the 30-year veteran of the postal service and a father of five was given his dismissal.

The postman, however, is back on the job again delivering all kinds of mail including the junk variety as the result of an assist by Rep. Ken Hechler, a West Virginia Democrat who has been a long-time low rate for bulk mail.

Hechler interceded with the Postmaster General for the full amount, expressing his sympathy for the man. The West Virginia went so far as to pass that this one act of courage served to dramatize the way in which taxpayers who subscribe junk mail are being taken advantage of by big commercial firms who profit by this mailing.

He further added that the postman's action should be applauded by taxpayers who have to pay higher taxes to subsidize junk mail and make up the deficit created by mail which doesn't pay its way.

The New York postman isn't the only one who resorts having to junk mail which has spotted routes has the same fate.

Electronic methods of sorting and delivering mail more for free travel and electric bills. The Post Office Department annually posts a deficit, but continues to operate mail at bargain basement prices.

removal of stains depends upon their being "digested" or broken down by enzymes. To get this done, you must use a detergent, not a bleach. Bleach acts on stains, for example, over their washing, but it does not remove them.

There are many strains of enzymes which are used in the manufacture of detergents. Their function is to break down or digest by chemical means the various types of organic body wastes, proteins, starches, etc. Enzymes are essential to the chemical processes involved in the digestion of these wastes.

## In-Service Training Available For Ky.'s L.P. Gas Industry

FRANKFORT—Establishment of an effective in-service training program for Kentucky's L.P. Gas industry was the theme of talks undertaken by L.P. Gas Committee members in a meeting at the State Fire Marshall Bill D. Williams' home in Frankfort, Ky., last week.

The group has recommended that all L.P. Gas users be trained and supervised by persons qualified through in-service training programs provided by the employer under guidance of the State Fire Prevention Division.
