council matters concerning Blue Grass?

It is hard for me to see how my job at Blue Grass Industries could result in my being compromised or influenced in any council decision that would not be in the best interests of the citizens of Carlisle. It is my firm belief that what is good for the City of Carlisle must ultimately be good for the welfare of its citizens, including residents, property owners, business operators, professional people, as well as industrial establishments, or vice versa. I am wondering why you didn't also ask if my seventeen years in a minister's home might not result in my being compromised or influenced in any decision concerning the churches of our community. Or, my three years with the school system might not result in the same thing where an educational program is concerned. Or, my fifteen years as a wife, or fourteen years as a mother might compromise or influence my decisions concerning the welfare of men or children.

The scientific way for arriving at a sound judgment or decision is:

1. Analyze the situation. Do I really understand the problem?
2. Define the problem.--What am I trying to get done?
3. Develop a solution. Is this the best way? What could go wrong when this decision is put into action?

To: Clifton Waugh
Candidate for City Council

1. What are your reasons for running for council?

The main reason because in two years time you just get a preliminary start and need two more years to really be a benefit to the city.

2. If you are elected, do you have any specific programs in mind for the betterment of our community?

My main objective to improve the streets and alleys. Also to help any program that would benefit the citizens and the city. I am very interested in making available recreational facilities for ALL ages.

3. How do you feel about the budget the present council has been attempting to put into effect, and what do you plan to do concerning it if elected?

I was one of the councilmen who worked on drawing up the budget and would make every effort to see that it is put into effect.

4. Please comment on the oft-made charge that the Mayor and not the council runs the City, and indicate what your position will be in this regard if elected?

I will strive to apply this method to any council decisions I make if I am chosen to serve in this capacity. However, I think you all will agree that the decision making process for anyone and everyone is compromised and influenced by their own realm of personal experience whether knowledge be it the butcher, the baker, or the candle stick maker.

TO: Alex Crawford
Candidate for City Council

1. What are your reasons for running for council?

I have a desire to help in the betterment of our community.

2. If you are elected, do you have any specific programs in mind for the betterment of our community?

Better and cleaner streets.

3. How do you feel about the budget the present council has been attempting to put into effect, and what do you plan to do concerning it if elected?

The city should definitely have a budget.

4. Please comment on the oft-made charge that the Mayor and not the council runs the City, and indicate what your position will be in this regard if elected?

I think the mayor and council should work together and no individual should have the authority to make the decisions.

5. Two controversial subjects the present council has been confronted with are the Blue Grass Knitting tax exemption and the burglary of the City Office. What are your thoughts in the way these matters are being handled by the council?

I believe every business should pay taxes just as individuals do.

6. It has been stated that you are a "mayor's candidate." How do you react to this charge?

I am an "Independent" candidate.

7. In light of the fact that one candidate for city office has withdrawn from the race because of the federal position he holds, do you feel there is any conflict between your position with the post-office and service as a councilman?

I do not! I have written permission from the regional office.
