

You Are Needed, Mr. Councilman!

Saturday Sept. 20 is the deadline for filing in for the City Council or Mayor in November.

And we don't think many here are aware of the deadline for filing in for the Mayor's office. It is the 20th day of the month, and the deadline for filing in for the Mayor's office is the 20th day of the month.

A man must accept this responsibility with little or no knowledge of how to do it. It takes about one and one-half to two years to really become effective in the position.

For example, this present Council was sworn in at the first meeting in January and afterwards was required to make an annual increase for City employees. Realizing how unfair this was to the Council and the City employees, the Council decided to change this procedure. It voted to delay future salary increases until after the next election. It is hoped that this is the beginning of a new era for the City.

Recently, in Lexington, Ky., an entire City Council resigned because the Mayor thwarted everything it tried to accomplish. In cooperation with our City Council in the same respect, but can only hope that our Councilmen will also give up and maybe even someone will have the sense to change this situation to the best way possible—by electing a new man to carry on the duties of the office.

It is hoped that this is the beginning of a new era for the City. It is hoped that this is the beginning of a new era for the City.

It is hoped that this is the beginning of a new era for the City. It is hoped that this is the beginning of a new era for the City.

It is hoped that this is the beginning of a new era for the City. It is hoped that this is the beginning of a new era for the City.

Tobacco Convicted Before All Evidence Is In

The Kentucky Tobacco Growers' Association has been convicted by the Kentucky State Police of violating the state's anti-smoking laws.

Observations

It is interesting to note that the Kentucky State Police have been successful in their prosecution of the tobacco growers. This is a significant step in the fight against smoking.

Kill The Big Truck Measure Again

Arthritis Is Everybody's Concern

Arthritis does not discriminate. It attacks and cripples Neanderthal, football players, race hounds and the elderly. Arthritis does not respect age, sex, race, income or social position. It is time to give arthritis the attention it deserves.
