

# It Takes \$4,112,000 To Run Local Cars

NEW YORK--Nicholas County families who will be taking vacation trips by automobile this summer will find that they need faster pocketbooks than in former years.

The cost of everything is up. Hotel and motel rates are higher. Food costs more, toll collections are more frequent and sales taxes are bigger in many areas.

The findings are based upon a survey of vacation travel costs throughout the country, made by the American Automobile Association.

As a result, the figures show, a Nicholas County couple will be spending approximately \$39.50 a day this year, traveling moderately, or about \$6 a day more than it does.

That amount will take care of the necessities but not such extras as souvenirs, amusements and admissions to places of interest.

Thus, a two-week trip will cost a local couple a minimum of about \$550. It assumes that they get 14 miles to the gallon of gas and that they cover an average of 300 miles per day.

The \$39.50 daily budget provides for \$14.00 for meals and snacks, another \$14.00 for lodging, \$8.50 for gas and oil and \$3.00 for tips and miscellaneous.

The AAA report also answers for Nicholas County car owners the all-important question of how much it costs them per year to own and operate their cars.

The average now is \$1,468 a year.

for a standard-size car in the medium price range, with automatic transmission, driven 10,000 miles annually.

This takes into account the fixed cost--for depreciation, insurance, license fees and such--amounting to \$1,053, or \$2.88 per day.

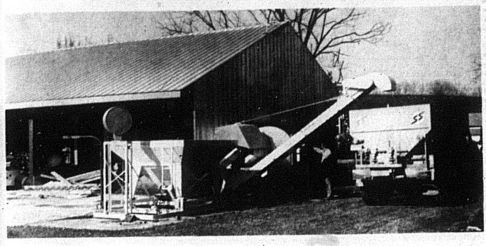

The other costs, covering gas, tires and maintenance, depend upon how much the car is used. For 10,000-mile operation they total \$395, or 3.95 cents a mile, on average.

The total cost per mile, 14.5 cents, compares with 12.0 cents five years ago.

On this basis, Nicholas County residents are spending some \$4,112,000 a year to own and operate the 2,840 cars in use locally.

Local gas stations have been profiting from the general increase in auto travel. Their gross receipts in the past year reached \$512,000.

## We've come a long way...

...but our job has just begun!

Not long ago, our main concern was seeing to it that everyone who wanted electric power could have it.

Today, however, assuring an ample supply of low-cost electric power to a continually developing, progressive area is a real man-sized job. And the needs of this area will double in the next seven years.

Your electric cooperative is always planning and building to keep pace with the ever-increasing need for economical electric power for home, farm and business. We still have a long way to go...

## Harrison Rural Electric Coop. Corp.

Farm real estate value has risen 64% since 1958 for roughly the same acre.

Farm real estate taxes rose 54% in the same period.
