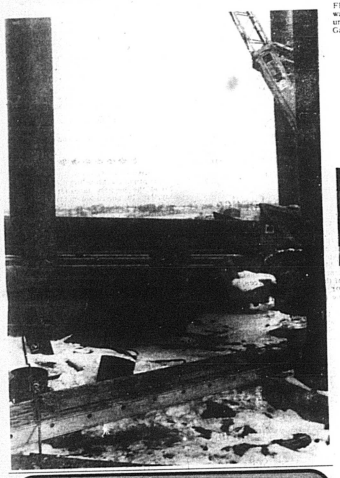
Weather Doesn't Stop Water Tank Construction At Blue Grass Knitting



FRAMED--At left, top, looking up the riser behind Blue Grass Knitting is the water storage tank being constructed by Caldwell Tank Company of Louisville, under the supervision of Mr. Thomas, and Howard K. Bell Engineer Buren Garten. At center is a closer view of the half million gallon storage tank which is 65 feet in diameter, 20 feet tall and contains 148,000 pounds of steel. It is welded both inside and out. Not all the work is completed inside the tank, according to Mr. Thomas, and as he says, "If the weather gets bad on the tower I can work inside." At right, another view of the storage tank with pieces of steel sheeting for the elevated tank. Lower left, a close up of steel tower supports. Center, the crane used for lifting tubular sections into place. Below, another angle showing tower supports. The elevated tower will be 119 feet tall, nearly six times as high as the storage tank. It will have a capacity of 200,000 gallons. At right, is the rear of Blue Grass Knitting, showing the 92,000 square feet additional space now under construction, and the underlying need for the city's water works expansion.--Mercury photos.

MR. AND MRS. THOMAS C. HARDIN

'Uncle Tom's Cabin' Is Delightful Movie

It's here after a 'short' wait of about 120 years!

"Uncle Tom's Cabin" is at long last on the giant screen in sweeping color, Harriet Beecher Sotwe, a minister's daughter, wrote this story in the late 1840's after an eye-witness tour of the Deep South. President Abraham Lincoln said the book helped bring on the Civil War.

The small fry, the teen-agers, the collegiate crowd, the young married couples, the middle-agers and our Senior Citizens make up the audiences. There is something in "Uncle Tom's Cabin" for all ages--and plenty of excitement for all.
