

OBITUARIES

MRS. CECILE SCOTT
Mrs. Vivian S. Scott, 80, the widow of Cecil Scott, died at 3:30 p.m. Saturday, March 13, 1971, after an illness of five months. She was a native of Nicholas County, and the daughter of the late Thomas Vaughn and Margaret Feeback Sellers, she operated Scott Produce for 40 years until her retirement. She was a member of the Carlisle Christian Church, the Carlisle Garden Club, Marie Chapel, O.E.S., the Carlisle West Homemakers, American Legion and VFW Auxiliaries, and was a Kentucky Colonel.
She is survived by two daughters, Mrs. Evelyn Iades, Fresno, Calif., and Mrs. Sue Woodall, Carlisle; two grandchildren and one great-grandson.
Services were held Tuesday at the Mathers-Shearer Chapel, by Rev. Harold Rice. Burial in the Carlisle Cemetery, Palisades. Mrs. John Ham, Elmer Dampier, Earl Hamm, Bob Anderson, Clyde Sexton, Paul Garrett, Eugene Neal and Stanley Caswell.

MRS. CLARINCE S. FRIEND
Mrs. Lucille B. Friend, 62, 111 South Ashland Avenue, Lexington, widow of Clarence S. Friend, died Friday, March 12, 1971, after a brief illness. She was a native of Nicholas County, daughter of the late Joseph H. and Edna Stump Berry, a member of Broadway Christian Church.
She is survived by one sister, Mrs. Melbourne Mills, Lexington; two brothers, John F. Berry Sr., Brooksville, Fla., and James O. Berry, Highland, Ohio.
Services were conducted by Rev. Dean Dickinson Monday at Kerr Brothers Funeral Home. Burial in Lexington cemetery.

JOHN W. SARGENT
John W. Sargent, 77, died at his home on West Main Street, Friday, March 12, 1971, from an apparent heart attack. He was a native of Bath, a member of the Carlisle Christian Church, a retired farmer, a veteran of WW I, a member of the American Legion and the VFW.
He is survived by his wife, Mrs. Pearl Mason Sargent; four sisters, Mrs. Gano Terrell, Dear-

born, Mo., Mrs. Ward Tomlin, Paris, Mrs. Carl Calvert, Bourbon County and Mrs. Bishop Wilson, Montgomery County.
Services were held Sunday at the Mathers-Shearer Chapel, by Rev. Harold Rice and Rev. Neil Thompson. Burial in the Carlisle Cemetery, Palisades. Edgar Allen Daylight, Yea A. Stone, James Lowe, Harlan Sken, James E. and William Tierrell. Nephews served as honorary pallbearers.

LEROY HERRINGTON
Leroy Herrington, 56, Route 1, Nicholasville, died in Paris Hospital Friday, March 12, 1971. He was an employee of Lexington Yellow Cab for 35 years, a native of Nicholas County, and the son of Nicholas County, and the late John and Grace Kenton Herrington.

Survivors are three sons, Barry, Lexington, Michael U.S.A.F., Keesee, Garnett, Bedford, Ind.; brothers, Lowell, Detroit, Mich., John R., and Buford, both of Lexington, sister, Mrs. Nancy Pope, Nicholasville; granddaughters, Shana Leitch, Herrington.

Services were held Monday at the Carlisle Memorial Chapel. Burial in Bluegrass Memorial Gardens, Williams.

MRS. WILLIAM M. ROSE
Mrs. Barbara Collins Rose, 64, of Route 6, White Oak Pike, Cynthiana, widow of William Newton Rose died Thursday, March 11, 1971 at the Lexington Memorial Hospital. She was a native of Mercer County and a member of the Old Union Christian Church. She is survived by a daughter, Mrs. Betty Rose Perratt, Harrison County; two sons, William and Perry Thomas Rose, Harrison County; three step-daughters, Mrs. Charles Layart, Bourbon County, Mrs. Spears Collins, Miller County, and Mrs. Robert Hill, East Lansing, Mich.; a step-son, Robert Rose, Bourbon County; two sisters, Mrs. James Garland, Franklin County and Mrs. Edna Smith, Nicholas County; two brothers, Levi and Billy Collins, both of Lexington, seven grandchildren.
Funeral services were held at 2 p.m. Saturday at the Smith-Rose Chapel, Cynthiana, by Rev. Robert L. Anderson. Burial in the Jackswaine Cemetery.

\$500-Million Highway Construction Industry Clean-Up is Implemented

The \$500-million highway construction industries of Kentucky March 17 implemented their \$100-million-a-year cleanup program to clean up the air and water at construction plants throughout the state.
First in the nation to act together, the highway construction industry has joined the Kentucky Industries for a Clean Environment (KICE) to clean up the air and water at construction plants throughout the state.
Announcement of the industry-wide effort was made in Frankfort by Buckner Hinkle, Paris contractor who is coordinator of the public affairs committee of KICE.

Most directly affected are some 115 quarries where crushed stone is produced and 120 plant asphalt installations.
"It may appear we are a little late in coming to the clean-air/clean-water party," Hinkle said, "but we've been getting ready for months. That fact generally known is that we simply didn't go to the store and buy an effective universal anti-pollution device. The job has to be customized for every quarry and plant asphalt installation. This holds true for companies operating more than one quarry or asphalt plant. One job simply can't be patterned on another."

"I want to emphasize we are very much in earnest. Allocation of the highway-construction industries contributes a relatively small amount to the estimated annual total of 150 million tons of air-borne pollutants, we probably are the most highly visible of all contributors. It's not easy to do care about County, three step-daughters, Mrs. Charles Layart, Bourbon County, Mrs. Spears Collins, Miller County, and Mrs. Robert Hill, East Lansing, Mich.; a step-son, Robert Rose, Bourbon County; two sisters, Mrs. James Garland, Franklin County and Mrs. Edna Smith, Nicholas County; two brothers, Levi and Billy Collins, both of Lexington, seven grandchildren.
Funeral services were held at 2 p.m. Saturday at the Smith-Rose Chapel, Cynthiana, by Rev. Robert L. Anderson. Burial in the Jackswaine Cemetery.

Robert Trussell Sr. and family, Mrs. Archie Layart, Bourbon County, Mrs. Robert Hill, Johnnie Shields and son and Mrs. Sterling Jackson were Sunday guests of Mr. and Mrs. Edgar D. Buckler and daughter, Tammie Sue. The occasion being the second birthday of Tammie Sue.
Mrs. Robert Trussell and son, Mrs. Ronald George and daughter and Bud Tolliver were callers Sunday on Mr. and Mrs. Sterling Jackson.
Mr. and Mrs. Arcobius Williams were Sunday afternoon guests of Mrs. Williams parents, Mr. and Mrs. George Ledford.
Miss Ida Cundiff and Henry Dazell spent last weekend in Paris as guests of Mr. Dalzell's daughter, Linda Sue George and Bud Tolliver.

Mrs. Roger Trussell gave a birthday dinner Sunday honoring Linda Sue George and Bud Tolliver.

cooked, one at 300 degrees and one at 450 degrees. The roast cooked at the lower temperature absorbed only one-half as much as the roast cooked at the higher temperature. When you cut a roast that meat takes 1/4 to 1/3 of your food dollar, this is important.
Frozens must be cooked, but a longer cooking time is required. Thick cuts of meat may require twice as much cooking time. Use a roast thermometer for accuracy.
Meat abounds in flavor and nutritive value. All lean meats are excellent sources of body-building protein, iron, and some vitamins needed for good health. Become familiar with your meats. Learn how to cook properly and you will not be disappointed in your meat.

FOOD PRODUCT DATING
What is "open dating"? The term is used by supermarkets when they label products for freshness—such as fresh milk, or refrigerated dough products. It helps the homemaker in storing and using products in the home.
Advocates of open dating feel that consumers are entitled to information on product freshness, and also feel it would make their job of stock rotation and removal of out-of-date food much easier.

Opponents to product-dating point out that temperature conditions and general methods of handling a product are more important quality determinants than time alone. Open dating would be costly because shoppers would search through products on the shelf to find the most recent date. This shopping habit would cause acceptable products to be rejected and eventually reach their expiration date so that product waste would increase substantially. This selective buying may lead to higher food prices. Retailers may place on the shelves only items bearing the same date—and the product completely sold or must be removed.

Further research has been proposed to study the usefulness and feasibility of open dating for both consumers and processors.

Kentucky, and we do realize we owe our best effort to its people." Hinkle estimated total payrolls of the various highway industries of Kentucky at more than \$200 million per annum and said it will exceed \$1 billion. He said it will cost from \$5,000 to more than \$100,000 per quarry to install efficient dust controls and from \$15,000 to \$30,000 per plant asphalt operation, depending in each case on site and location. Plants in metropolitan areas fall into the upper cost brackets.
The KICE campaign has the enthusiastic backing of Gov. Lou-

Three Steps Outlined For Program Participants

Compliance by farmer certification is now nation-wide for participants in the 1971 farm-set-aside programs for feed grain, wheat and cotton. From a limited beginning in 1964, this method of accepting the farmer's word that he has followed program regulations has now become standard for most counties—nearly 2,800 across the nation.

In Nicholas County, farm program compliance by certification will be used for the first time this year.
This method of compliance is used for all crops except some types of tobacco. Where recent photographic copies of fields and farms are provided farmers, who then use these photographic copies to designate their set-aside, crop, and conserving base acreages when certifying that they have complied with farm program provisions.

According to Harvey Wagoner, Chairman of the Nicholas County Agricultural Stabilization and Conservation (ASC) Committee, certification is actually the third formal step a farmer takes in participating in the feed grain, wheat, and cotton programs for 1971.

First step is signing up at the County ASC Office. Signup for these programs is in progress now and will continue through April 9, for the nation and will not necessarily apply county-by-county.

B. Nunn, Highway Commissioner, H.E. King and ranking officials of the state air and water pollution commissions.
Frank P. Parize of Frankfort, director of the Kentucky Air Pollution Control Commission, said that the response of Kentucky Highway Industries members has been enthusiastic and positive, and we have enjoyed good cooperation in achieving compliance. We expect to have all facilities and operations in full compliance within the time prescribed by law.
The highway industries must be in compliance by March, 1972.

F.H.A. Supervised Credit Plans

Farmers Home Administration, an agency of the U.S. Department of Agriculture, is doing much more than talk about rural development. The 36 offices of this agency are making it possible for rural Kentuckians to have and enjoy pure water, a sanitary waste disposal system, new houses and economic assistance in the form of loans for farm ownership, development and operating loans.

John H. Burris, State Director of F.H.A., anticipates 4,000 new homes will be built, 24,480 people will be served by newly constructed water and sewer systems and 1,500 farmers will be assisted in their farming operations by F.H.A. loans they were unable to secure through normal credit sources during the 1971 fiscal year. This assistance to develop is being accomplished by approximately \$60,000,000 in loans made for sufficient time to be repaid by the borrowers under the F.H.A. supervised credit plans. No loans are made if satisfactory credit can be obtained through regular financial sources.

Two day meetings are currently being held at six selected places in the state. All F.H.A. personnel are being trained in the procedures conducted as program and training seasons to acquaint them with new procedures and ideas. Completion of this training should make it possible to serve an increasing number of people next year.

Farmers Home Administration personnel take pride in doing their part to make rural America a better place to live and are hopeful of showing the exodus of people from the over-crowded cities.
Farmers Home Administration personnel who serve Harrison and Nicholas Counties, Kelly Thompson and Dorothy L. DeKosar, attended the training sessions held at Morehead.

Final date for certification for the wheat program is June 1 and for feed grain, July 15. Following certification, program participants must continue to comply with farm program regulations throughout the calendar year.
Spot checks on approximately 25 percent of the farms in the 1971 set-aside programs will be made following certification, to help assure full compliance with farm program provisions. The ASC Committee Chairman said the 25 percent figure is an average for the nation and will not necessarily apply county-by-county.
