by MARY LEE

Ever stop to think that our supermarkets are really in the health business? For example, the meat depart-ment gives you protein, iron and B vitamins. The dairy section has calcium, protein, riboflavin. Baked goods and

at produce centers, the AA, B, C vitamins flourish along with needed minerals.

Many of our larger supermarkets stock as many as 11,000 different food items but what they really sell are 57 kinds of nutrients in four 57 kinds of nutrients in four basic food groups. That makes the supermarket the world's biggest and most complete bank of nutrients.

complete bank of nutrients. Time was when people at the most anything just to fill their stomachs. But modern heart and their stomachs. But modern heart and their stomach states are value-less. Nutrition is the essential factor in family health. Flavor is good, color is fine, and texture in food can be on them alone. You have to have a balanced diet to stay healthy.

Although each person's needs are different, the connects are different, the connects are different, the connects are different, the connects are different, the con-

Although each person's needs are different, the concept of good nutrition means a supply of all 57 nutrients in adequate amounts for each person to be ideally nour-ished. Smart shoppers know they need proteins, minerals, they need proteins, minerals, read that the state of the
