

NCHS 44-member band in KMEA at MSU Oct. 16

Nicholas County High School's 44-member marching band is participating in the sixth annual KMEA Marching Band Festival Saturday, Oct. 16, at Morehead State University.

Bands from 44 junior and senior high schools are competing in the festival sponsored by the Kentucky Music Educators Association. Performances begin at 11 a.m.

Each band will present a seven-minute show and be rated on playing and marching ability.

MSU's Marching 200, host band for the festival, is scheduled to perform at 6:15 p.m., following by announcement of the ratings.

Dr. Robert Hawkins directs MSU's band.

The festival open to the public. Admission is \$1 for adults and 50 cents for children.

Dr. Glenn Fulbright, chairman of MSU's Music Department is coordinating the festival.

Nicholas County qualifies for Federal Development Aid, EDA head announces

Robert A. Podesta, assistant secretary of Commerce for Economic Development, today announced that Nicholas was one of 109 counties in 17 states that are now considered qualified for Federal financial programs under a 1971 amendment to the Public Works and Economic Development Act.

Podesta heads the Economic Development Administration, the U.S. Department of Commerce agency working to stimulate industrial and commercial growth in areas of the Nation with high unemployment and low family income.

He added that the newly qualified counties must prepare Overall Economic Development Programs (OEDPs) before they can be designated as redevelopment areas eligible for Federal grants and loans.

The low-income amendment on which today's action is based enables EDA to qualify an area with a 1960 median family income of 50 percent (\$2,830) of the national median (\$5,660) for designation as a redevelopment area. Previously, an area could have a median family income of no more than 40 percent (\$2,264) of the national median to qualify for assistance under this section of the Public Works and Economic Development Act.

Podesta said the 1960 Census figures are used by EDA because the 1971 amendment will be eligible for the full range of EDA benefits. These include:

- Grants and loans to help communities build public facilities essential to economic growth.
- Loans to help private enterprises establish or expand job-generating operations.
- Planning and technical assistance to help solve problems blocking growth.

To qualify for EDA funding, specific projects must be consistent with an area's Overall Economic Development Program. The OEDP consists of an inventory of an area's resources and needs—including an establishment of priorities to obtain these needs. The long-range plan helps to assure orderly growth. Podesta said there are 1,363 areas—including 768 areas of high unemployment—qualified for participation in EDA programs.

Meat consumption up

Government figures indicate a changing pattern of eating in Nicholas County, with meat and potatoes riling the bell the loudest and some other foods dropping in popularity.

On the basis of a national survey made by the Department of Agriculture in 1969, it appears that people in the local regional area are consuming meat at the annual rate of 147 pounds per person, or nearly 23 pounds more than in 1960.

And, because meat and potatoes go together, potato consumption has also gone up—from 107 pounds in 1960 to about 116 pounds at the present time.

The increased use of meat, a comparatively expensive item in the diet, is an indication that people are living better than they did a decade ago, according to the economists.

Their incomes rose faster than the cost of goods and services over the 10-year stretch, even though there was little or no spread during the last year or two.

With the change in eating habits, one-fourth the total number who hunted deer in the county.

According to figures tabulated by the Game Management Division of the department there were 11,700 bow and arrow deer hunters in 1970. The total number, and archery, was 45,700, with 7809 successful. Of this number the bow and arrow men and women brought home 697 deer. The best year for the archery hunters was in 1968 when 930 deer were taken by 7900 hunters.

Last year was the biggest from the standpoint of hunter participation, but this apparently will not last for long. County clerks are now selling deer hunting permits rapidly in preparation for the upcoming season, and this year's number may exceed all records.

And still, with this careful planning for the harvest of surplus deer, the population continues to inch forward and eventually will reach the carrying capacity for Kentucky habitat.

Deer tags, which must be held by all deer hunters, cost \$10.50 and are valid for the bow and arrow and gun hunter, resident or non-resident.

And so, with the increasing deer herd came a sportsman-reaction-hunting with bow and arrows.

10-year tax bite on local residents

How much richer would Nicholas County residents be today if they had not had to pay taxes during the past 10 years? The answer is a lot richer.

How big a chunk was extracted from their pay envelopes for Federal income and social security taxes?

For those people who have often thought about their tax load and wondered how much of their income is shunted off each year without their ever seeing it, the Tax Foundation has done some figuring and come up with some answers, based upon family averages.

Currently, it finds, the first 13 hours of worktime in any week go to pay Federal, state and local tax bills. In other words, a local worker has to put in all day Monday and part of Tuesday to earn enough for his taxes.

A major part of it represents the amount Uncle Sam withholds from paychecks for his two biggest taxes—income and social security. This combination more than doubled in the last 10 years, due partly to higher earnings.

In Nicholas County, as in most parts of the country, income rose sharply in that period.

All told, the average family in the local area earned a grand total, prior to taxes, of about \$55,900 in the past 10 years, the statistic shows.

A considerable part of it, approximately \$7,300, was skimmed off, before they ever got hold of it, by Federal income and social security tax deductions.

This is only part of the tax burden, however. It is the visible part. The other part is the so-called "hidden" taxes, such as the Federal excise taxes on automobiles, gasoline, liquor, telephones, tobacco, transportation and the like.

The Tax Foundation estimates that these and the other taxes passed on to consumers were included, the average family government collects another \$74 in taxes for every \$100 it receives via income and social security taxes.

Applied to Nicholas County, the figures indicate that the local population paid an estimated \$5,400 per family in hidden taxes in the 10 years.

Warren speaks for Republicans

Delbert Warren spoke in Nicholas County on Tuesday night, Oct. 12 as a member of the Emberton-Hoat Victory Squad appearing in 120 Kentucky counties that night.

Warren, president of Warren Lumber Company and Warren Builders, is a master plumber and real estate broker.

Officials of the Emberton-Hoat campaign said that speakers would appear in every county at approximately the same time to outline the many reasons for supporting the Emberton-Hoat ticket.

Tom Emberton is the nominee for Governor in the November-General Election and Jim Hoat is the nominee for U. S. Governor.

Bond sales are \$4,066

Sales of Series E and H Savings Bonds in Nicholas County for August were \$4,066 while sales for the first eight months totalled \$31,367 of the county's annual goal of 112,100. Sales a year ago were \$32,135.

Kentucky's sales for the month were \$5,931,864 while cumulative sales for the year reached \$42,046,769 for the State's annual goal of \$53,400,000. Sales a year ago were \$37,938,224.

Obituaries

FRANK WILBERT SIEDEL, Frank W. Sieidel, 92, father of Mrs. Sag Kaab, former resident of Carlisle, died noon Monday, Oct. 11, 1971, at Golden Shores Convalescent Hospital, Tampa, Fla. after a long illness. He had been a resident of Sarasota, Fla. for the past 12 years, moving there from Norton, Va. where he had lived for 51 years.

Mr. Sieidel was former mayor of Norton and judge of police court from 1926-1928. He served as chairman of the Department of Public Welfare for Wise County, Va., 1942-1955. He was treasurer of the Board of Stewards, a member of the First United Methodist Church and a member of the Selective Service Board during World War II.

He was a native of Apple Creek, Ohio. Educated in Columbus and a graduate of a business college. He came south to West Virginia with the Ritter Lumber Co. as a bookkeeper while a young man. Prior to coming to Norton, he was connected with the First National Bank of North Fork, W. Va.

He survived by two other daughters, Mrs. John W. Agee, Tampa, and Mrs. Charles Robert Helwig, Detroit, Mich.

Three grandchildren, Frank W. Agee, Betty Zoe Agee, Tampa, and Charles R. Helwig, Detroit.

Funeral services were held Tuesday at 3 p.m. from Richard Evans Funeral Home, East Lexington Street, Columbus, Ohio. Burial in East Lawn Cemetery, Columbus.

Deer population increases in Ky.

FRANKFORT, Ky.—Some things just seem to set off a chain reaction.

We're talking about the deer population and the great increase in the number of bow and arrow hunters in Kentucky's archery deer hunt.

Time was, back in the 40's, when there were scarcely enough deer to dent the census totals. Then the sportsmen backed the Department of Fish and Wildlife in stocking suitable areas with deer and with strict protection for those deer stocked.

Through this cooperative understanding, Fish and Wildlife has been able to bring back the deer populations to upwards of 60,000 and to permit the hunting of these animals in every county in Kentucky.

To harvest the surplus production of principally the white-tailed deer, seasons have been opened to bow and arrow hunters throughout the months October and December in every county. Gun hunters also have their season, a five-day period beginning this year Nov. 13 and extending through Nov. 17.

The bow and arrow hunters may harvest either sex deer, but gun hunters, who harvest the greatest number of surplus deer, take only bucks with forked antlers or antlers except for a three-county area, Barren, Hart and Edmonson, where either sex deer are legal.

Of course, only one deer may be taken per season by a hunter and to permit the hunting of these animals in every county in Kentucky.

This great increase in the number of deer harvestable has brought on with a rush an ancient hunting sport which devotes as by the pursuit for all—archery.

Back in the mid 40's when there were no deer, and therefore no game for the archery boys to practice on, the sport was mostly confined to club meetings in which the contests concerned accuracy with the arrows at a given distance. Then in 1957, a deer hunting season was proclaimed for 26 counties and right away the interest of the archery clubs picked up. They began to expand, attracting new members on a statewide basis.

The growth has been continuous and the participants have been more active in greater areas of the state have been opened to deer hunting. This deer hunting phase has undoubtedly been the greatest incentive to try the fancy the bow and arrow. Archery participants last year were roughly

Jaycee Blue Jets win again

The Nicholas County Blue Jets Pee Wee football team, sponsored by the Carlisle Jaycees, combined an aggressive defense with an explosive offense to take a 20-12 victory over the Valley Vikings yesterday on the local high school field Sunday afternoon.

Two first quarter scoring plays came in the third quarter when half-back Anthony Williams found day-afternoon star right end and ran 50 yards for the score. Williams plunged for the extra point was good, making the score at the end of the third quarter 20-6.

The rugged Blue Jet defense permitted the Vikings' only one fourth quarter, after Nicholas County had lost a fumble to the Vikings in the Jet territory. A short drive was capped off by Viking halfback Mike Mullin's 10 yard run for the touch-
