A STATE OF THE STA

traumatic credit crunch such as occurred during the closing years of the 1969s. The brunt of any interest-rate rise is likely to come at the short end of the money-rate scale, with only a moderate firming of long-term rates. Keep in mind that the total of new boosting starts will probably seas it in 1972. Moreover, corporations are generally in_good financial condition setter building up their resources over the past two years with the aid of the investment tax credit. The the aid of the investment tax/credit. The Babson staff looks for corporate profits after taxes to go up about 12% in the new year compared with 16% in 1972. Even this smaller gain, however—coupled with the freeze on corporate dividend disbursements—will enhance business

One area of unique in the money-auc picture may be traced to the government's doorstep. The U.S. Treasury is slated for fairly active refinancing in 1973, and the unusual and unexpected tax receipts that have come n during 1972 through overwithholdin will not be seen in the new year. Whethe

in flaring. 1973 through one-withdishing the history of the control of the contro

priced convertible debentures and convertible preferred inclea.

The outry for tax reform, the singering repriced federal budget defert, budg

work into still higher territory over the next 12 months. The possibility of a move
