Outdoor Lore

Far back in the North Fork River Country of Lastern Ken-tucky where few, save forest rangers, conservation officers, and cognity extension agents ever go, there is a high wooded to the control of the certain and which dissolves the rock into sand. Then when

terminates in a straight-down drop of about 200 feet.

At the end of this rocky point, which commands a long stretch of river, there is a great other forms of plant life,

of November, this bed, from a considerable utility. One of the of November, tims bed, from a distance, appears as a greenish-gray outdoor carpet, litmus, long used by agrilike those modern homemakers use to cover patios and to determine the soil's acidity

gether in a partnership without gathering motinnents from which neither could exist. In motivate in the air and storing this symbiotic relationship, one them away for islow, gadual plant-an alga-though the upper size of photosynthesis, its they have a high valuerability makes the food. The other-a 'discounsed that characteristic fora excessive daying and sumplement supplies the other work of the properties of furnity to the contract supplies the properties of the properties o

other the shelter. This somewhat spectacular air. This somewhat spectifically air growth on the North Fork River represents only one of color-gary, yellow, brown, handreds of forms of lickens that have long been considered the world's mone presistent plants. They can survive the called them "Meek creatures; toolest weather of Arctic regions, the extremely thin as the called them "Meek creatures; toolest, which the label of the service of the called them "Meek creatures; to grow the called them "Meek creatures, to grow the called the mosphere of the highest dustless rocks; creatures full of mospinere of the ingress mountains, and the searing heat of the hottest deserts. Their growth is extremely allow and since they live upward to 1000 years, they have been 1000 years they have 1000 years they 1000 y

1,000 years, they have been called the Methuselahs of plants.

Taking hold as they do upon barren rocks, lichens are truly soil-building pioneers and truly soil-building pioneers and abode much more beautiful.
