

Compton returns kickoff

shut-out the drive completely when he almost picked off a Simons' bomb in the end zone. After three more offensive plays, Dick Watson was off-tackle 20 yards for Fleming's second score of the night. The kick was wide to the right, making the score Fleming County 12, Jackson 0.

The Jackets returned the kickoff to their own 22 and in 14-14 plays carried the ball 66 yards to the Panther 12-yard line, where the Jackets were checked-out, but still this was a very nice drive

and was termed by Panther coach Plumbery "the longest sustained drive against us in four years."

Fleming County roared back up the field for the second half when with time running out in the half, Danny Simons began to go to the air in search of a quick, third first half score. The Jackets' secondary was ready, however, and held three Simons' passes for no gain. The half ended with Fleming County holding a 12-0 lead.

The Panthers came back out on the field for the second half determined to get untracked and blow the Jackets' kickoffers off the field in a hurry. Fleming County was looking sharp and was picking up yardage like it was free. After three quick first downs to the Jacket 40, Simons-to-Gary Hahn-pass complete to the 10 was called back for holding. The Jacket defense buckled down and forced the Panthers to punt from mid-field. Freshman "Trippy" Clark got off a beast as the Jackets were forced to start over from their own 10.

The Jackets were held again and Anderson's fourth down punt was returned 15 yards to the Nicholas 30. Hahn went off-tackle on first down, reversed his field breaking — back-tackled and recovered. Panther line brought this one back as they were called for holding. Dale Rice came right back with an explosive 45 yard burst down to the Jacket one yard he was

PRO-MO LQ PROTEN

Pre-Mo is a liquid feed supplement providing 32% protein for use in feeding ruminant animals. It contains essential nutrients that enable dairy cattle (heifers and dry cows also) beef cattle and sheep to use grains and forages more efficiently in the production of milk and meat. These ingredients are premium grade molasses, phosphoric acid, liquid urea, trace minerals, Vitamin A, Vitamin D and Vitamin E. These ingredients are blended in a modern process by Southern States Cooperative, Inc., to prevent separation and maintain ingredient stability.

It is a real labor saving way to provide supplemental protein in a wheel feeder.

What to do in September

By Neville Shackelford
 UK College of Agriculture

LINCOLN—September for most gardeners is a month of mixed emotions. It is a time when there is a sense of regret and relief tinged with a bit of nostalgia. The summer that is all its splendor and beauty is nearly gone and relief that much of the hard work necessary since early spring is over.

But to keep the time occupied and to get the most of the hard work necessary since early spring is over. If ornamental plants are to be kept in the garden, gardeners can enjoy the beauty of fall flowers, which are at their best at this time of year. Franklyn, Administrator of N.J. Clark, estate

Rising college

Continued from page one

The show that no less than 8,500 young men and young women will be attending college this year. This compares with 2,935,000 in 1960, or 1960 of this number, some 20 years ago. What it will cost per year depends upon where they are going. The lowest cost, according to a nationwide survey made by the Lilly Insurance Agency Administration, Inc., is \$1,246 a year. This is the median rate for in-state residents at public colleges in the South.

It takes into account tuition, room and board and fees. Not included are travel expenses, books, clothing and incidentals. In other sections of the country it runs higher than that—\$100 more in the West, \$200 in the North, \$300 in the East and \$300 in the Northeast.

For students coming from other states, the cost of \$600,000 for Nicholas county parents is based upon half the local students going to public colleges and half to private ones.

Nuclear-power plants and laboratories are being built. A new cleaner, containing lanolin and glycerin, contains a new emulsifying agent because it washes completely away and cannot collect in pipes. Now this same cleaner is being marketed as a non-abrasive hand cleaner. It is formulated in a plastic bottle. It is said to be so gentle it can be used as a skin-care cream.

POSTED
