

Let's hear it for the U. S.

Once again America seems to be everyone's favorite whipping boy. This time it's the energy shortage and talk of recession...

"Does any other land in the world have a plane to equal the Boeing Jumbo jet...?" "Yes, why don't they fly them? Why do all the international lines except Russia fly American planes?"

Facing the energy crunch

Much is being written and said about the energy crisis. As it worsens, the business community and the general public will look increasingly to the media for accurate and up to date information...

Americans put their rights in the store window for everybody to look at. They are entitled to know their rights...

"If we, as the United States, were to break down Canadian laws and get American dollars from law-abiding citizens..." "I'd like to see just one of those countries that is glowing over the erosion of the United States..."

Best features and more may be next spring and summer—that will be the reward of farmers who renovate their pastures and hay fields.

FACT: The U.S. has huge supplies of fossil fuels—oil, coal, natural gas, uranium, and more. The U.S. has one-third of the world's energy reserves...

Thursday, Dec. 24, 1973 Santa Claus will return to Carlisle about 2 p.m. Christmas Eve...

County extension agents Paul F. Windness and Sara Kinser are available for assistance...

grasslands this winter. Because of the state's expanding cattle industry, there has seldom been more need to improve pastures and hay fields.

FACT: The U.S. uses one-third of the world's energy. Energy waste in the U.S. is estimated at close to 60 percent of consumption.

FACT: One-fifth of energy consumed goes for home and commercial heating, one-fourth is used for transportation, another one-fourth for the generation of electric power and processes that waste 10 percent of the energy input.

20 and 40 years ago

Thursday, Dec. 24, 1953 Santa Claus will return to Carlisle about 2 p.m. Christmas Eve...

"They will come out of this thing with their flag high. And when they do, they are entitled to thank their neighbors at the lands that are glowing over their present troubles."

"I hope Canada is not one of these." From Canadian commentator Gordon Sinclair, some thoughts on America—as "how darkly see it—and, as it truly is."

FACT: With a pipe in the ground, it is possible to do a lot of things in a hurry. In fact, it is possible to do a lot of things in a hurry.

FACT: Cutting back gasoline usage will help to dispel such doubts. FACT: PEOPLE ON earth have used more gasoline in the last 20 years than they have consumed in all history up to 1960.

FACT: The U.S. gets about 10 percent of its petroleum needs from the Arab. Arab oil production is forecast to drop in the rest of the world.

NURSING HOME NEWS

It's just like I heard Al Simpson say several years ago, we should have Christmas every day.

My second graders to memorize this. When I was a child I always felt a little sad on Christmas Day thinking I would have to wait a whole year until Christmas came again.

MERRY CHRISTMAS From our home to yours— an old-fashioned wish for a holiday filled with things happy memories are made of. We appreciate your loyalty.

For more information call your local representative. Brookie George 289-5097. Warehouse 255-7309.

by Mrs. Virginia Smith Donovan

Wednesday morning I heard a little knock on the door. It was my good friend and old roommate, Virgie Bell. She was wearing that same old Christmas dress she had worn at the time she was sent to the workhouse...

Monday David Williams, an orderly, worked his last day here at the home. David Williams, a fine man, had been here for 15 years...

My oldest granddaughter, Terri Ann Shaver, was born on Christmas Day. She is the first child born to her father and mother since the death of her mother, Mrs. W. W. Shaver, in 1967...

SANTA LETTERS Dear Santa, We have tried to be good girls and boys this year. There is four of us, Heather, Erin, Colleen, and I. We would like a doll called Softina, and a baby buggy, Ernie, and a doll called a tractor and wagon, a pretty doll, and a baby stroller, Collier, and a doll called a baby walker, Heather, and a doll called a rattle, Whitney, age 11, would like a tape recorder, some stationary, and some records. Under the tree you'll find some cookies and candy and a glass of milk. Thank you for the toys you brought us last year. They were great. We hope Mrs. Santa Claus is well. We love you both. Heather, Erin, Colleen, Whitney, Mather

Dear Santa, I am a little girl 5 years old. I would like to have a Christmas doll named a doll called a tractor and wagon, a pretty doll, and a baby stroller, Collier, and a doll called a baby walker, Heather, and a doll called a rattle, Whitney, age 11, would like a tape recorder, some stationary, and some records. Under the tree you'll find some cookies and candy and a glass of milk. Thank you for the toys you brought us last year. They were great. We hope Mrs. Santa Claus is well. We love you both. Heather, Erin, Colleen, Whitney, Mather

Love, Lisa Clark

Notice

I wish to thank those who supported me in the recent City Council election.

Sincerely, Earl Marshall

ENERGY CRISIS?

the L&N hauls more freight more efficiently and with less fuel consumption!

The L&N is responsive to the needs of your community and to the coming generations of American men and women. The energy crisis means out only a relatively small part of the total fuel supply, the services they provide are essential to the economic growth and wealth of the entire nation.

ESSENTIAL FACTS When comparing energy requirements for the movement of intensive freight, modern electric diesel locomotives require about 1/3 the energy of your duty-diesel trucks per ton-mile.

Let's work together to help conserve precious energy for present and future generations to enjoy. L&N logo.

You better believe \$80,000 doghouse is the Impossible Dream

Every since my first three old wells came in, I've been doing my Christmas shopping from a mail order catalog from Neiman-Marcus in Dallas. This book allows you to see what you want, with just enough of their gift ideas to prove you are not a fellow who has everything.

business there. They charged \$100 admission and sold everything from stained glass to a complete kitchen set to Texas outfit. This book allows you to see what you want, with just enough of their gift ideas to prove you are not a fellow who has everything.

them until they got the idea to sell for lower pots and stilling plants bowls. "The last time I saw any of these architectural articles left to sell," he concludes.

The last time I stepped on a cat's tail, I got flack from that magazine and it wasn't around the country. It was the only thing that has happened to me in a long time. I am not sure if it is a coincidence or if it is a sign of things to come.

Agree or Not

FRANKFORT—The State Board of Education last week approved five steps to aid state public schools during the energy crisis but one important factor to teachers was not included.

But with the advent of air conditioning, this life pattern isn't followed these days. People vacation at all times of the year. The only problem about holding school during the summer months is that only a few of the newer school buildings are air conditioned and would be extremely uncomfortable for pupils and teachers.

big advantage to plastics would be that they could be destroyed after use. It's estimated that 90 per cent of materials needed for the manufacture of plastic products are recycled.

A good farmer it is reported can harvest 1,000 pounds of seeds from an acre of soybeans. He offers that he is harvesting them I've seen several fields of red birds that could do the job.

Up, up and away.

the present school calendar year, from
