IT'S WISE TO USE ELECTRICITY — USE IT WISELY

Use your refrigerator-freezer efficiently. Save electricity. Minimize opening doors. Make sure frozen foods are properly wrapped. Read your manual!

Chances are an ice expert could get your defrosting done fast. But with a new electric refrigerator-freezer no frost need form in the first place — eliminating a real chore. You can also make fewer trips to the store; stock up on freezer bargains for better dining at less cost.

A modern big-capacity refrigerator-freezer takes no more floor space than your old unit.

The Book of Job fifteenth season

Outdoor drama

This mosaic make-up on an actor in THE BOOK OF JOB makes him appear as a living mosaic figure.

The world famous outdoor drama, The Book of Job, will open its 15th season on Thursday, June 28 at Pine Mountain State Park Amphitheatre at Pineville.

During the past 15 years, The Book of Job, has been featured at two World's Fairs—Brussels and New York. It has enjoyed two New York runs, four national tours, and four international tours.

The dazzling production is presented every summer during July and August, nightly, except Sundays, at 9:30 E.D.T.

The unique mosaic makeup is painted on the faces. The actors appear as living mosaic figures, gleaming in brilliant costumes of red and gold, blue and purple.

The New York Times said of The Book of Job: "An awesome and most majestic rendition. The imagination is stirred—the eye magnetized. The Book of Job should not be missed."

GET YOUR $ WORTH

BY SALLY AND JIM ADAMS

S-T-R-E-T-C-H YOUR DAIRY DOLLAR

Dairy products are an important and necessary part of your diet — and next to meat probably the most expensive food group on your grocery bill. Here's how to cut the cost of your dairy items without sacrificing that all-important nutrition.

Last November we listed the simple ways to stretch your milk dollar. Briefly, we noted that milk delivered to your door costs about six cents more per quart than if you lugged it home from the supermarket yourself; that you can save five or six cents a quart by buying in half-gallon containers; that a family using three quarts a day will save around $150 a year by switching from regular fluid milk to instant nonfat dry milk. There is an added bonus in that it's also lower in calories.

Now let's look at the possible savings on other dairy products.

Think about substituting margarine for butter; you'll save 50 per cent or more. Margarine is cheapest in sticks; whipped margarine (and whipped butter) will cost you more because you're paying for the air that was beaten into it to make it more spreadable.

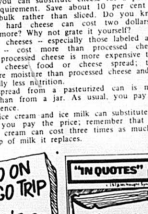
If you don't like margarine — even for cooking — you can still save by buying U.S. Grade A butter for table use rather than the more expensive Grade AA. Use the Cheaper U.S. Grade B for cooking.

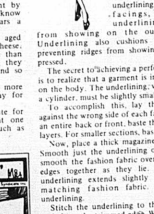
As an adult, you need two or more cups of milk daily, but you can substitute cheese for a part of the milk requirement. Save about 10 per cent by buying in bulk rather than sliced. Do you know that grated hard cheese can cost two dollars a pound and more? Why not grate it yourself?

"Natural" cheeses — especially those labeled aged and sharp — cost more than processed cheese. Pasteurized processed cheese is more expensive than pasteurized cheese; food or cheese spread; they contain more moisture than processed cheese and so proportionally less nutrition.

Cheese spread from a pasteurized can is more expensive than from a jar. As usual, you pay for the convenience.

Yogurt, ice cream and ice milk can substitute for milk, but you pay the price; remember that one cup of ice cream can cost three times as much as the half-cup of milk it replaces.





FASHION N FABRICS

By FANNIE GLEESON

THE BEAUTY OF UNDERLINING

We sew for many reasons and for many moods. Sometimes, the quick and easy appeals, when time is short, but something extra is needed in the wardrobe. At another time, we may have felt the need for a hand-some outfit that would be a long-lasting asset, worth the extra devotion to detail.

Curiously, we often find ourselves rushing through the quick-and-easy as though someone were holding a stop-watch. But, find ourselves relaxing with a more extensive project, taking it step by step, and, so proud of the accomplishment, when the last button is sewed.

The type of outfit featured today is one you'll enjoy thoroughly. This Vogue American pattern will be used over and over in various types of fabric from seersucker

to velvet. The units of semi-fitted jacket, vest, skirt and pants can be coordinated ad infinitum.

Underlining is one of the secrets of adding beauty and greater wearability to clothes that you are going to treasure. Underlining is simply a supporting fabric that adds body to the fashion fabric and helps shape it. It also aids in resisting stretching and wrinkling.

It does something else, too. It eliminates overhanging of the fashion fabric as pattern construction marks are made on the underlining. Hems, interfacing, and facings, are caught to the underlining, preventing stitches from showing on the outside of the garment. Underlining also cushions seam and hem edges, preventing ridges from showing on the outside when pressed.

The secret to achieving a perfectly smooth underlining is to realize that a garment is in reality a cylinder when on the body. The underlining, which is a cylinder within a cylinder, must be slightly smaller than the outer fabric.

To accomplish this, lay the matching underlining against the wrong side of each fashion fabric section. For an entire back or front, baste through the center of both layers. For smaller sections, baste along one edge.

Now, place a thick magazine just over the basted line. Smooth just the underlining over the magazine. Then, smooth the fashion fabric over the underlining. Pin the edges together as they lie. You will find that the underlining extends slightly beyond the edge of its matching fashion fabric. Trim away the excess underlining.

Stitch the underlining to the fashion fabric one-half inch from the trimmed edge. While stitching, underlining should be on top, and stitching should be done in the direction indicated on the pattern.

Baste through the center of all darts and tucks and through pleat lines to prevent the underlining from slipping in these design details.

Leave hem edges free until the garment is ready for hemming, when slightly excess fabric may be smoothed into the hem or trimmed even with the fold line.
