USDA revises meat grading to include bulls

The U.S. Department of Agricultur The U.S. Department of Agricuma-hus announced its revision of beef gradie standards to provide for grading meat from young bulls. In an effort to hold down consumer meat prices, producers feel they may be able to produce more beef more economically by feeding young bulls specifically for market.

armalie in used ten as been are alreier of most customers are customers are customers are customers and a customers are customers and a customers are customers as the customers are customers as the customers are customers as the most free young bulls is raded, the word "Bullock" must be dided onto the carross abong with the millar USDA greate shell.

which about Decouse of interest veloped in feeding young bulls peculy for the production of radial ed. This interest developed after veloped a feed of the customers are customers and time respectly and time reporting and efficiently and to less fat than steep.

The USDA announced that the grade standards revision will become effective on July 1, 1973. After the effective date, consumers in Kentucky and other states will have the opportunity to see how they like bullock meat. If the animal is to be classified a bullock, he must be under the two year

Wednesday for Uradinem from her physician.
