### *Winterize your car*

Now is the time to get cars ready for winter," according to Doug Shoulders, safety coordinator for the Kentucky Department of Transportation.

Shoulders urges drivers to check their tires. "All treads should be at least 3/16 inch deep. Have snow tires installed now if you are planning to use them."

According to Shoulders, other points to check in getting a car ready for winter include: chains, wiper blades, defroster and hoses to the heater which often dry-rot during the summer months.

"Be sure to locate your windshield scraper," he added.
