

Newspaper Week Oct. 7-13

Newspaper Week, Oct. 7-13, will be met with its share of "so-called" bad news. Those who like the taste of freedom, it will be time to contribute to one of the most important guardians of free expression.

A newspaper's talents and responsibilities are many. It is the editor and his staff who, perhaps the most important, are responsible for the news. They are the ones who, by their own special way, bring a little of the news to the people's eyes and ears. They are the ones who, by their own special way, bring a little of the news to the people's eyes and ears. They are the ones who, by their own special way, bring a little of the news to the people's eyes and ears.

Bad news is good

In these days of dry newsstands and dismal headlines, it sometimes seems as if journalism's prime purpose is to give everyone a good reason for ending it all. But, in fact, the bad news is really good news.

American journalism is based on the public's right to know. In the sciences, political power, crime in the streets, uprisings and downturns in the economy, skyrocketing prices and taxes are things which everyone should know about for they affect our daily lives and may change them dramatically. By being aware of them in advance, we can prepare for them.

Our right to a free press must be protected. It is the only way that we can be controlled by the government, most of the news is good, but the way of living is as awful as can be.

The news is better

W.A. Lasswell, in a column appearing in the Griffon (Florida Carlisle) newspaper that since there didn't seem to be much good news for the 1970s, he would go back to report and find some good news to report. And so back he went to the 1970s, and that is what he found to report for the news of the day.

On the crime front, the '70s have had a low and order problem. Noting that the crime rate is about twice that of today, the rate is going around about the same, and the Indians are also on the rampage. In the cities traffic is jammed, the streets by day and you can hardly get around for the horses and wagons. The toughs and crooks take over the streets at night and it is not safe to go out.

In New York City the fish are rising and demanding their rights. In the streets and in San Francisco the Chinese are dividing the establishments in a hurry. The taxpayers of New York found out that Ross, Tweed has taken them for millions. Confidence in our political

Obituary

Thursday, October 4, 1973

It was decided Tuesday at meeting of the Nicholas County Fiscal Court to put an end to the problem of dog killing sheep in the county by establishing a dog pound at the county farm and hiring a man to catch and impound all stray dogs.

A five member dance band, the Dixie Flyers, has been formed in Carlisle using local talent. Frank Lyman, a county distributor, is the main pillar in the temple of human freedom as we know it in the United States.

MERCURY
By Warren R. Fisher

A SMALL-CITY NEWSPAPER EDITOR who once came up with a solution to the pollution by automobiles that he calculated that the 750,000 cars in his county provided 16-million horsepower and the cars were replaced by an equal amount of power in horses—the horses would eliminate the smog but would produce 1.8-million tons of manure each year. In two months would raise the floor of the entire county by one foot.

Agree or Not
By S. C. Van Couron

FRANKFORT—The Kenton County Democratic Executive Committee pulled a switcheroo on State Party Chairman J. Miller last week by voting to draft Wendell H. Ford to run for the U.S. Senate seat now held by Sen. Marlow Cook, R-Louisville.

Executive Committee Chairman Larry Haake was quoted by the AP as saying, "It is our first chance to get Wendell H. Senate seats and the governorship. I. G. Ford, Julian Carroll can't be beaten for governor and Wendell Ford is the strongest Democrat in Kentucky."

"I believe in one newspaper interview," Haake added, "Ford said what the people of Kentucky wanted very much."
