

## Tuesday is election day

Your vote in Tuesday's election could be more significant than your vote in the national election a year ago.

There are always fewer voters cast in off-year elections, so each vote cast is more important mathematically. Second, most of us are affected more directly by the actions of local officials. Third, the federal government does not spend itself very effectively in dealing with local concerns.

State and local governments should, separately or in cooperation with each other, find the means to carry greater responsibility for the planning, support

and performance of public services. And where federal funds are involved, they should be handled responsibly for constructive programs and not relegated to the maintenance of unproductive overhead at the state or local level.

Support should be given to candidates who support programs which contribute to more effective and self-sufficient state and local governments without encroaching on activities which should be left to the private initiative.

The choice is yours. You can help assure good government here at home with your vote.

## Senator Dee Huddleston

REPORTS TO THE PEOPLE OF KENTUCKY

**THE PAPERS CONTROVERSY**

The President's decision to turn over the Watergate tapes to Judge Sirica was a welcome relief to the President and the public. The President's decision to allow the firing of Special Prosecutor Archibald Cox and the removal of Attorney General Elliot Richardson and Deputy Attorney General William French

The President has taken a step in the right direction, but I also think it is extremely important that the name of a special prosecutor so that we can have an independent, thorough investigation.

In the line of Mr. Richardson's confirmation, the administration made several pledges concerning the complete independence of the special prosecutor. These pledges concerning the complete independence of the special prosecutor were not honored. Mr. Cox was first referred to further investigations relating to the tapes and then when he was first fired. I think Congress will insist that a new special prosecutor be named.

This past week, I held the third in a series of meetings at different locations throughout Kentucky. This session in Paducah allowed me and my staff to hear from many Western Kentuckians concerning their problems and needs. The session mentioned most often were education, water and sewer programs, Social Security, veterans' benefits, and parks and recreation needs.

Earlier, my office conducted meetings in Lexington on rural development and in Louisville on mass needs. Next on the agenda will be a meeting in northern Kentucky to be followed by a conference in Eastern Kentucky.

Senator Hubert H. Humphrey and I have just completed a series of hearings on the strategic and foreign elements of the U.S. agricultural system. As part of those hearings, we had a report prepared by the Economic Research Service of the U.S. Department of Agriculture which examines the American agricultural system in detail.

If you or any of your friends would like a copy of this publication, please write to me at 3227 Dirksen Building, Washington, D.C. 20543.

**YOUR BEST VOICE IS YOUR VOTE**

It's a lot easier to get credit than to get your vote.

## Agree or Not

By S. C. Van Curon

FRANKFORT—State Auditor Mary Leake has set her fiscal year for the other day in a speech before a local civic club by saying, "If I had the staff to do a thorough audit of state (taxpayer) credit cards, I would find many of the new cars only get a few dollars worth of private transportation above their cost."

She was referring to state employees and officials use of state-owned vehicles to commute to work or use them for private transportation above their cost. She indicated the cars are used more for private use than in official capacity.

The peripatetic Miss Leake (and I use the word advisedly) probably gives citizens more value for their dollar than any other agency in the state government. Her office is charged with auditing every branch of state and county government plus school boards. Her office has one of the smallest budgets in state government which led her to say to the civic club, "It could be they keep

## MERCURY VAPOURS

Monday morning was one of those fall mornings that stirred the gastric juices and sent one seeking hot biscuits, sausage, homemade apple sauce from mom and apple pie.

With such thoughts circulating in my memory banks, I gingerly approached the head — "Kay's Kitchen" with such a suggestion and believe it or not, such was the news for the Monday evening meal.

The diet. It's good with the wind.

—MV—

The other evening when I wanted to jot down a couple of notes before they escaped me, I could not find a scratch pad and much less a scrap of paper. It was then that I began to realize what is meant about a paper shortage. Being that I turned it to the electronic medium and noted my thoughts on tape.

—MV—

**LATE BLOOMING**

Just recently ago I saw above me a stem filled with bright yellow blossoms from one of the Forsythia bushes that seemingly has forgotten it's fall. She

YOU CAN'T WIN FOR LOSING!

## Ballooning bureaucracy

The vast, overlapping power of government is illustrated in an advertisement which ran in the neighborhood newspapers near our nation's capital. Sponsored by a public utility, the "ad" announced that a request to build a nuclear power generating plant has been reviewed by:

The U.S. Atomic Energy Commission, the U.S. Environmental Protection Agency, the U.S. Department of Health and Human Services, the U.S. Department of Health, Education and Welfare, the U.S. Department of Commerce, the U.S. Department of Transportation, the U.S. Department of Housing and Urban Development, the U.S. Department of

Agriculture, the U.S. Department of Engineers, the Federal Power Commission, the Council on Environmental Quality, the Maryland Public Service Commission, the Maryland Department of Natural Resources, the Maryland Department of State Planning, the Maryland Department of Economic and Community Development, the Maryland Department of Health and Mental Hygiene, the Maryland Department of Transportation, the Maryland Academy of Sciences, and Charles County, Maryland.

It is interesting to contemplate how many millions of dollars in extra cost to the taxpayer and to the buyers of electric power is represented in the ballooning powers, divisions and departments of government. We can but guess the mountains of paperwork and the thousands of man-hours consumed by a single departmental application of just one project.

Granted, good government will seek to protect the interests of the people. But, sometimes we get the feeling of being "protected" all the way to the poorhouse.

## DA and HO

Thursday, November 1, 1953

Howard K. Veach, Carlisle Postmaster for the past 19 years, retired Saturday, Mrs. Mary Lee Scott was appointed Acting Postmaster and has assumed her duties.

William Power was elected mayor of Carlisle in Tuesday's election. Joe Clay was elected police judge. City Council members elected are: Eugene Neal, H.C. Galbraith, Charles C. Stratton Jr., Woodrow Wilson, William Harper and William H. Frey.

DIED—Mrs. Ben Wilson, 82, Sharpless Monday, Cecil John Donaldson, 52, Georgetown, Friday in Lexington.

"That was a good sermon on generosity. When do I get my new winter coat?"

## Read Meety

Long ago I learned how to uncover tight can lids. First I let my young son bust a gut on it. Then I take it over and push him out of a snow drift, the next best thing to grunt, groan or yell like a karate frog.

You'll be surprised, it says here, all the power you can muster up this way. It might even be enough to beat off the bully boys in white when they come for you with the net.

—ip—

If you have an accident in Edmond, Wash., just hope a fourth grader doesn't come to your rescue. Their school teacher revealed some of their remedial notes on a first-aid quiz.

FOR HEAD COLDS: "Use an aspirin to spray the nose until it drops in the gray."

FOR NOSE BLEED: "Put the nose lower than the body."

FOR SNAKEBIT: "Bleed the wound and wipe the victim in a blanket for shock."

FOR FRACTURES: "Use if the limb is broken, wiggle it gently back and forth."

FOR FAINTING: "Rub the person's chest, or if it is a lady, rub her arm above the shoulder."

FOR ASPHYXIATION: "Apply artificial respiration until the victim's dead."

—ip—

Outside of the newspaper people, doctors are always the last to learn anything.

For years, newspaper have understood the benefits of bourbon for keeping the mind sharp and limber, but it was only recently has been revealed how doctors have prescribed regular, moderate amounts of spirits for the treatment of the elderly.

The doctors concluded that none apparently believes the inhibitions in man, allowing him full use of his mind to whatever that means.

Semper schnepp.

because that group upped their output 10 per cent. The grunting, hollering bunch did right well in the test. They were downed by a 15 per cent increase in productivity.

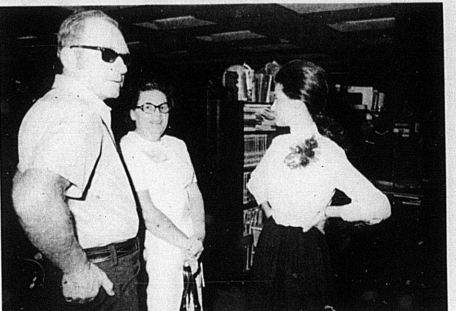

The doctors concluded that none apparently believes the inhibitions in man, allowing him full use of his mind to whatever that means.
