Insulation: the key to the economy of Electric Heat

Let the facts speak for themselves:
Home built: 1968
Living area: 1460 square feet
Heat: electric ceiling cable
Computed heating cost: \$183 annual average
Maintenance cost: 5 years, \$15

Home with coal furnace like these are normal examples of electric heating costs. We have thousands more. The key to that economy is proper insulation. This home had ceiling R-32 walls, R-15 floor, R-13. That's where we come in. If you or your contractor calls we can help you plan the most economical installation.
