Bailey named to Who's Who

Ricky Bailey son of Mrs. Katherine Bailey of Carlisle and Edward Bailey of Winchester was recently notified that he has been listed in the Eighth Annual Edition of Who's Who among American High School Students.

Students from over 30,000 public, private and parochial schools throughout the country are recognized.

Ricky, a senior, is active in the French Club, Future Business Leaders of America and the Honor Society. He was chosen to represent his class at the Junior's Conference at the University of Kentucky and was also a deligate from Nicholas County High School to the Kentucky Youth Seminar held a U.K. in June.

He will compete for one of ten scholarship awards of $500 to $1,000 funded by the publishers.

The amazing American Simmental cows:

100 to 150 lb. heavier weaning weights in 2 generations.

It wasn't just curiosity that got commercial cattlemen interested in Simmentals. They were determined to increase weaning weights.

The first infusion of Simmental semen brought results: Half-blood calves weighed 50 to 75 lbs. more than non-Simmental calves of the year before. Same dams. Same pasture.

Now those half-bloods have weaned their first crop of 3/4-blood Simmentals. Their performance data, collected in accord with Beef Improvement Federation standards, is reported in the 1974 National Simmental Sire Summary:

3,175 3/4-blood
Simmental calves averaged 514 lbs. at 205 days
69,136 1/2-blood
Simmental calves averaged 436 lbs. at 205 days
Gain in second generation 78 lbs. per calf

Where was the test held? On 2,936 management units in every part of the United States. All conceivable conditions are included in the averages.

Simmentals offer more than just crossbred vigor. When the second generation averages 78 lbs. more than the first, won't 7/8 and straight-breds weigh even more?

Start an American revolution in your herd. Breed 'em all Simmental.

The cow makes the difference.

"Full loads mean full value from your electric water heater"
Mrs. Kay Hultaker, KU Home Economist

Follow these tips from our laundry center expert, and you not only use electricity wisely but also your laundry appliances and water heater. Wait till you can wash full loads (which means more efficient use of your clothes dryer, too). If you must wash smaller loads, adjust water levels according to instruction manual. Don't overheat water; keep thermostat at 150-155 degrees.

Sensible water use habits help assure better, more efficient appliance performance and longer service—for full value. Even your water bills benefit.

For other homemaking ideas and answers, call one of our home service representatives.

KENTUCKY UTILITIES COMPANY

It's wise to use electricity...use it wisely!

GENERAL REVENUE SHARING

ACTUAL USE REPORT ④

General Revenue Sharing provides federal funds directly to local and state governments. Your government must publish this report advising you how these funds have been used or obligated during the year from July 1, 1973, thru June 30, 1974. This is to inform you of your government's priorities and to encourage your participation in decisions on how future funds should be spent.
