

Obituaries Oliver Vice to head

MRS. EMMA V. BROOKS
Mrs. Emma V. Brooks, 78, died Thursday, Feb. 27, 1974 at her residence in Bath County.
She was a native of Bath county and a member of the Frenchburg Baptist Church.
She is survived by one son, Paul Brooks, Carlisle; two sisters, Mrs. Estill Back, Bath county, and Mrs. Susie Cook, Irving, Texas; five brothers, Bill Brooks, Oystertown, Mo., Albert, Charles and Dave, all of Bath county; one grandson, Paul David Brooks, Oystertown.
Funeral services were conducted at 2 p.m. Saturday, March 2, at the First Funeral Home by the Rev. Buddie Rhodes. Burial in the Ingram Cemetery in Bath county.

MRS. J.E. KENTON
Mrs. Julia Moss Kenton, 96, widow of J.E. Kenton of Hebron, Ky. died Friday, March 1, 1974.
She was a native of Nicholas county, daughter of the late Daniel F. Ash, Mary Hannah Moss.
She is survived by three sons, Herman, Melvin and Stanley Kenton; two daughters, Mrs. Beulah McCall, Miss Mollie Kenton, and a granddaughter raised in them, Mrs. Mildred Mitchell, 13 other grandchildren and several great-grandchildren.
Funeral and burial in Hebron on Tuesday, March 5, 1974.

Nicholas County landfill operators invited to attend short term training session

Some 30 operators from public and private landfills from Anderson, Franklin, Scott, Harrison, Nicholas, Bourbon, Clark, Powell, Estill, Madison, Garrard, Lincoln, Boyle, Mercer, Jessamine, Fayette and Woodford counties have been invited to participate in the short term training session in all phases of garbage collection and disposal which is scheduled to begin the first of April.
On-the-job training incorporating new skills and procedures into actual work situations will be available to Central Kentucky landfill operators this spring in training sessions sponsored by the Department for Natural Resources and Environmental Protection (NREP).
Funded by a \$12,900 grant from the U.S. Department of Labor's Manpower Development and Training Administration (MDTA), the program is designed to supplement training and improve techniques now employed in all phases of garbage collection and disposal, according to Bill Holland of the NREP solid waste division.
Without proper training, which he described as the "key" to efficient

Supplemental security income programs replaces public assistance payments

A new program of the U.S. Government called supplemental security income became effective in January 1974. This new program takes the place of Federal-State programs of public assistance payments to people who are 65 or older or blind or disabled. Persons who have little or no regular cash income and who do not own much in the way of property or other things that can be turned into cash such as stocks, bonds, jewelry, or other valuables, may be eligible for supplemental security income.
The aim of the program is to provide monthly checks, when they are needed, to all anyone who's 65 or older or blind or disabled can have a basic cash income—for one person at least \$10 a month and for a married couple, at least \$210 per month.
A single person or married not living with his spouse) can have assets worth up to \$1600 and still get payments. The

Energy office to issue fuel action pamphlet

FEO and USDA are jointly preparing a pamphlet explaining procedures and action that should be taken to help assure that farmers get enough fuel to meet their needs, announces Paul E. Hall, Executive Director of the Nicholas County ASCS Office. (This pamphlet, which will be available soon, will be mailed to every farmer in the county.)
The pamphlet is titled "Fuel Allotments for Farmers" which designates steps farmers must take to get priority distribution of fuel supplies.

Savings bonds sales reported

December sales of Series E and H Savings Bonds in Nicholas county were \$1,483, bringing total sales for 1973 to \$47,514 or 74.1% of the county's annual goal. 1973 sales were \$79,500.
Statewide cumulative sales for the year reached \$2,218,161 or 101.5% of the 1973 goal. Sales in 1973 totaled \$6,814,394.
Nationally, sales of Series E and H Savings Bonds totaled \$6,368 million in 1973. The total cash value of Savings Bonds and Freedom Shares outstanding reached \$60,812 million.

Tree planting cost sharing available

Landowners interested in planting trees this spring may sign up for cost-sharing at the ASCS office in Carlisle. This is part of the new Rural Environmental Conservation Program (NECP). If you are eligible, the ASCS will pay 75% of the cost of trees and planting, plus site preparation, if needed. A Service Forester with the Kentucky Division of Forestry must inspect the planting area. This can be done soon after the application is received by the ASCS office.
Landowners who are interested should sign up right away as approval can be made for planting this spring.

Limited number of synthetic tobacco beds covers available

With cotton covers for tobacco beds in short supply, synthetic covers are now on the market in the burley belt.
The synthetic covers have been tested for three years and will produce plants rapidly with proper management, according to Ira Massee, extension tobacco specialist at the University of Kentucky College of Agriculture.
The synthetic covers are usually referred to as nylon covers. Massee says the ones offered for sale last year were extremely fragile, but the ones offered this year have been increased in weight by 25 percent and have been tested in the areas and under conditions.
"Beds with these covers produce plants ten days to two weeks earlier than cotton-covered beds," notes the UK specialist. "They seem to hold in more heat and moisture, which speeds up the growth of the plants."
Massee says that when the synthetic covers are used, the beds should be treated, seeded and handled in the normal way. However, the beds getting the synthetic covers should be the last ones seeded.
At seeding time, these covers should be placed directly on the beds without any wires, poles or bottles to hold them up. The covers should not be stretched when pegged down, says Massee, because they expand and contract according to the temperature.
The synthetic covers cost about half as much as cotton covers. A few growers have used the synthetic covers for two seasons. However they were originally developed for only one season's use, and only about 50 percent of the nylon threads are left after one season.

Massee says only a limited number of the synthetic covers will be available to growers this year. "There were only about three percent of as many manufactured as there are beds," he points out, adding, "A continued supply is questionable since the covers are made from petroleum products. However, enough will be available this year that we can continue testing them."
Form FEO-17, or some other form available from the company, as to their actual needs, unless applying for emergency help.
Mr. Hall said farmers needing emergency help should apply directly to the State Energy Office in Frankfort by using Form KOPA 20. This application is temporary help only. "KOPA 20 forms are available at our local office," Mr. Hall says. "Our office will help farmers in filling out a KOPA 20." Emergency help should only be requested if a farmer is having difficulties obtaining needed supplies.
Mr. Hall reminds farmers that a "Priority Customer" applies only at a bulk plant, not at service stations. "This is not saying a farmer couldn't get fuel at a service station, it just means he would not be a priority customer when buying at service stations."
FEO regulations require farmers and others receiving allocations at the 100 percent level to certify to their suppliers that they have an energy conservation program in effect. Farmers are to use priority fuel only for agricultural production, and to buy no more than enough to meet 100 percent of current needs.

sanitary landfill management, Holland said the sites would be little more than the more liberal open dumps.
Field instructions will be held at different landfill sites, Holland said.
"The instructor will take the training to the operators. If he (operator) needs assistance manual or bulldozer, that is what we will show him, or equipment maintenance, stockpiling cover material, planning, collection techniques, or whatever."
In addition to eight weeks on the job training, participants will receive seven days of classroom instruction covering all aspects of solid waste disposal and individual studies applicable to personal job needs.
This is the first MDTA grant Kentucky has received to train landfill operators, Holland noted. He said the money was sought because operators indicated specialized training in the area has not been available.
A second MDTA grant for \$19,000 has been approved for the solid waste division to conduct similar training sessions in Eastern Kentucky. Holland said the Eastern Kentucky project will emphasize training over a longer period of time.

Four students from Nicholas County High School have been invited by Rep. Adonis Arnold to serve as pages in the House of Representatives in Frankfort for one day. The students, members of the Advanced Government Class, along with Donny Tackitt, instructor, were in Frankfort all day Tuesday, March 12. Girls' sports bill passes

FRANKFORT—The Senate recently passed a bill (SB 73) requiring secondary schools to offer girls' tennis, track and swimming teams for girls if such programs are maintained for boys.
A floor amendment was approved permitting a delay of the measure's enactment until the 1975-76 school year if personnel are inadequate.
Sen. Tom Ward, D-Versailles, the sponsor of Senate Bill 73, explained that he offered the bill after receiving favorable comments for such a program when the "basketball bill," SB 72, was aired at committee hearings.

He noted that women representing statewide athletic programs endorsed SB 73 but said it was not sufficient.
Sen. Walter Strong, D-Henryville, stated he would like the bill to read "may offer" rather than "shall offer."
Sen. Strong, a minister, also added he was not going to "endorse mixed bathing in public schools."
Sen. Ward replied that he favored mixed swimming, but not bathing. He, the spouse of Senate Bill 275, explained that he offered the bill after receiving favorable comments for such a program when the "basketball bill," SB 72, was aired at committee hearings.

Shearer assigned to Germany duty

Pfc. Virgil C. Shearer Jr., husband of Mrs. Debbie Shearer, Carlisle and son of Mr. and Mrs. Virgil Shearer Sr., of Carlisle, recently returned to Germany after a leave of 30 days with his wife and daughter, Rheta Michelle. He will be stationed in Stuttgart, Germany for a period of 11 months. His address is Pfc. Virgil C. Shearer Jr., APO-S-808, HHC 2nd Ln, 4th Fl., APO New York, New York, 09154.
