October proclaimed 'Cooperative Month'

At a breakfast proclaiming October as "Cooperative Month", Gov. Wendell H. Ford paid tribute to Kentucky's agricultural and rural cooperatives, but warned that they were entering "one of the most challenging periods that cooperatives have ever had."

Speaking to the Kentucky Council of Cooperatives, Ford gave credit to the vital role played by fuel production in the U.S. economy. Although deploring the use of food "as an international weapon", he said that food "is the only weapon we have to equalize our balance of payments."

Ford saw the dairy and tobacco cooperatives as being faced with a double challenge—to keep the price of food down and yet "to provide food and fiber for the nation."

Ford also emphasized the importance of the electrical cooperatives. There is a probability of another energy shortage this winter, he said, and pointed out that the proposed reduction in allocations of natural gas greatly would increase the demand for electricity, especially that supplied by the Rural Electric Cooperatives.

In the face of expected shortages of oil and natural gas, Kentucky's huge coal reserves would prove invaluable, Ford said. In meeting the challenge of fuel shortages, Ford also pledged the support of state government and cited the aid of the state Energy Office during the last energy crisis.

Ford went on to say that the long-term effects of energy shortages could benefit Kentucky as the nation once again turns to coal as its principal fuel. "Kentucky has known coal reserves of 50 billion tons and expected reserves of a further 50 billion."

With the perfection of techniques of liquefaction and gasification which would 'cleanse' the coal and make it easier to transport, "Kentucky could become the Saudi Arabia of the United States," Ford said.

Louis Strong, vice president of the Kentucky Council of Cooperatives, agreed that agriculture continued to be America's largest industry and added that "if other industries had increased their efficiency to the same degree as agriculture, there would be no problem with our balance of payments because no other country would be able to compete with American products."
