Don't pinch pennies!

The 64 billion pennies minted in the last 15 and one-half years are more than enough to meet all business needs. The fact that we have more pennies than we can use is a national disgrace. It is not only a waste of money, but it is also a waste of resources. The fact that we have more pennies than we can use is a national disgrace. It is not only a waste of money, but it is also a waste of resources.

Halloween

Hunted homes, moaning spirits and shrieking old ladies cowering and hiding children are part of the Halloween season. It is a time to celebrate the dead and to have fun. It is a time to celebrate the dead and to have fun.

United Mine Workers threaten strike

Coal supply decreasing, cost increasing

By S.C. Van Curen

FRANKFORT—With winter approaching, a possible fuel shortage is being feared by many coal producers and consumers. The United Mine Workers of America, some people are warning will be taking up the issue of a coal strike in the near future.

Another significant thing has happened in the race. United Mine Worker President Arnold W. Miller and the national council of the Coal Miners Political Action Committee have endorsed Governor Ford. This could be a significant move. This could be a significant move.

Mrs. Ina Payne has a beautiful red begonia from a friend in Indiana. It is a beautiful plant. It is a beautiful plant.

Mrs. Margaret Burrows Wilson was around one day passing bitterness to her friends. Margaret still has her gift of personality. Margaret still has her gift of personality.

OUR FORD—No one but America's Ford—Ford may not be a Lincoln, but he's Kennedy's Ford and year after year he'll prove Kentucky's point, we need a Ford to hold the line on taxes.

Herbert Conyers had a wonderful surprise a night or two ago. His granddaughter, Willie Paye Mather and brought her children. It is a happy occasion. It is a happy occasion.

Another factor in the coal shortage has been the inability of the nation's railroads to furnish enough hopper cars to deliver coal to utilities and other users of coal in large quantities. It is a significant problem. It is a significant problem.

Inflationary increases in cost of supplies and equipment, higher costs in transportation by rail and truck, increased labor costs in wages and overtime, plus additional labor needed to meet requirements of the law have all added their parts to the cost of coal. It is a complex issue. It is a complex issue.
