President changes selective service registration method

A Presidential Proclamation has changed the method of registering with selective service. Young men are no longer required to register within 30 days of their 18th birthday. After April 1, they were required to register under a new procedure. A plan for probable annual registration is being developed at the national level, according to Colonel Taylor L. Davidson, State Director.

Announcement of the new registration guidelines will be made by proclamation as required by law he said. The State Director anticipates this will probably be made toward the end of 1975.

According to the official the change in method is a part of the national on-going studies to reduce the cost of maintaining a Selective Service System in support of the all volunteer force.

Prior to the cutoff date a young man registered within a period beginning 30 days before or 30 days after he reached 18.

Colonel Davidson said, the method of continuous registration in the standby was highly successful during calendar year 1974. Selective Service in Kentucky registered more than 31,000 men born in 1956. This was 99 percent of National Headquarters estimation for the particular year of birth group, and 11 percent above the national average. "This was achieved with the day-by-day support of more than 800 public spirited citizens who served as volunteer registrars. This included educators, county officials and members of their staff, and others from local government agencies", Colonel Davidson said. He also has high praise for the media of public information for the assistance they provided.
