New farm wheat share

A new farm wheat allotment may be established for 1976 crop wheat acreage for farms that did not have a 1975 allotment, if they meet eligibility requirements, and file an application at the county ASCS office in Carlisle.

A 1976 wheat allotment will be established automatically for most farms that had a wheat allotment in 1975.

To be eligible for a new farm allotment, the operator must expect to receive more than 50 percent of his income from farming. Neither the farmer or operator may have an interest in any other farm which will have a 1975 wheat allotment, at the time the request is made. The person making application must have had at least one year of wheat production experience in a prior year.

Applications for a new farm allotment may be filed at the county ASCS office on or before July 1, 1975.

Any interested producer who can meet these requirements should contact the county office before the final date for filing an application.

ASCS outlines 1975 conservation program

Nicholas county farmers who plan to start conservation practices under the Agricultural Conservation Program (ACP) are urged, as the first step, to discuss their farm's needs with the county office of the Agricultural Stabilization and Conservation Service (ASCS). Eugene Letcher announced.

"There are some differences between ACP and the 1974 conservation program and when a farmer has determined the conservation needs on his farm he should contact our office," Mr. Letcher said. "Important ob-

USDA burley tobacco quota transfer regulations

The U.S. Department of Agriculture (USDA) has announced changes in policy governing the transfer of Burley tobacco quotas that would permit transfer to farms not presently holding a basic quota. USDA had previously required a farm to hold a Burley quota before permitting the transfer of additional quota poundage. (Under the Burley tobacco program, unlike the programs for other types of tobacco, quotas are expressed in terms of poundage rather than acreage).

Under the new program, transfers to interested individuals, not currently eligible for a new farm quota, to enter the Burley tobacco market. Just as with transfers to quota farms, quota leases to nonquota farms will be filed with the local ASCS office and will have to be between farms in the same county. USDA officials feel that the change in policy is necessary to permit a number of interested individuals, not currently eligible for a new farm quota, to enter the Burley tobacco market. Just as with transfers to quota farms, quota leases to nonquota farms will be filed with the local ASCS office and will have to be between farms in the same county.

GRADUATION EXERCISES

'Prepare for Action' - A. P. Hill

Personnel in two combat engineer construction companies in the Kentucky Army National Guard work on the clearance of a 25-acre site near the Fort A. P. Hill, Va., site as part of their annual summer training. The land eventually will be needed and used as additional clearance area for aircraft coming to the field. The two companies,

C from Jackson, and D from Carlisle (the 301st Engineering Battalion, composed of 124 guardsmen from Carlisle and Oystonham under the command of 1 Lt. Bruce W. Pierratt of Lexington) were part of a training exercise involving more than 1,000 Army Guard and Army Reserve personnel from Virginia, Kentucky,

Pennsylvania and New York. Training at the post located midway between Richmond and Washington started on May 31 and concluded June 14. The training was under the supervision of the 196th Engineer Group, a Virginia Army Guard unit based in Richmond, Va.—Virginia Army National Guard photo
