Half of county tobacco stripped

Demand was not quite as strong for Durley tobacco during the third week of the auction. The Federal-State Market News Service reports grade averages showed small declines from last week. No major changes were noted. Volume was a little heavier and the percentage placed under loan increased.

A little more than one-half of the Nicholas county crop has been stripped and will be sold before the market closes after four days of sales this week, according to Motele Conrad, Nicholas County Extension Agent for Agriculture.

Losses in grade averages amounted to only 1/10 of 1 percent for most cases and occurred for about half the grades. Top prices by companies held at \$21 per hundred. Grade averages ranged from \$121 for R1P to \$86 for NK2.
