State Market News Service reports that the volume of sales was much lighter during the sixth week of burley tobacco auctions, with several markets already closed for the season. The Federal Reserve Bank of Kansas City reported that the percentage placed under loan decreased from the week before.

Loon receipts totaled 1.8 percent of sales this week and 7.4 for the season. The U.S. Crop Reporting Board in the January release estimates production of the 1978 crop of burley tobacco at 636,330,000 pounds—down only 630,000 pounds from the previous report.

Markets which have closed for the season include all of Tennessee, North Carolina and Virginia; Bloomfield, Greensburg, Henderson, Lexington, Mountain, Mayfield, Owensboro, Paducah, Glasgow, Horse Cave, Somerset, Springfield, Huntington, Va., and Weston, Mo.

Averages increased by \$1 to \$3 per hundred for most grades except mixed and no-descript which gained \$5 to \$5 in price.

Unofficial burley support for 1976 at \$1.09 estimate

FRANKFORT, Ky.—State Agriculture Commissioner Tom Harris said Tuesday the unofficial report that the support price for the 1976 burley crop will be \$1.09 "is good news for Kentucky burley producers."

Harris said he learned of the increased support level for the 1976 crop at the burley quota meeting in Lexington last Friday. He said he has talked further with Dr. Robert Miller of the U.S. Department of Agriculture's Economic Research Service, who said it appears that under the burley support price formula, this year's support level will be right at the \$1.09 figure, compared to 96 cents for the 1975 crop.
