REMEMBER 34¢ GASOLINE!

Be happy if your local gasoline prices have dropped slightly, but remember they are still almost double what they were a short time ago. Don't forget the energy crisis. It's all well as in the American news imports more oil from foreign countries than we did during the time of long waiting lines. That means we still are subject to blackmail by countries who can cut us off when they wish.

The electric energy crisis has gotten worse. And you'd better believe it. Costs for most materials needed to produce and deliver electric energy still are climbing. The need for electricity continues to grow. And only three straight mild winters have kept us from banging heads with an electric energy shortage. You know we didn't escape rising costs even with mild weather.

Don't be misled by "coer experts" who know nothing of the problems but seem to have easy answers to everything. There are no easy answers. The best thing you can do... is to avoid wasting all kinds of energy. Contact your electric cooperative and get helpful facts about energy and money saving from people who really care about short supplies and rising costs.

Fleming-Mason Rural Electric Cooperative

Flemingburg, Kentucky

Today's tip: Savings from installing proper insulation, storm doors and windows are great enough to pay for the installation in just a few months. From then on, it's all savings.

Tractors need improvements states Council

The National Safety Council says much effort has been made in improving the safety of tractors and in farmers to operate tractors safely.

A recent report states that on the average, tractors are operated more hours than any other piece of farm equipment, and are therefore involved in more accidents. The three major causes of tractor-related injuries are overturns, falls from, and power take-off.

To avoid tractor accidents farm safety officials say tractor operators should:

- Securely fasten the seat belt if the tractor has a roll-over protective structure.
- When possible, avoid operating the tractor near ditches, embankments and holes.
- Reduce speed when turning, crossing slopes, and on rough, slick, or muddy surfaces.
- Stay off slopes too steep for safe operation.
- Watch where you are going, especially at row ends, on roads, and around trees.
- Do not permit others to ride.
- Operate the tractor smoothly, no jerky turns, starts, or stops.
- Hit only into the drawbar and hitch points recommended by tractor manufacturers.
- When tractor is stopped, set brakes securely and use park lock if available.
- According to farm safety officials, all new tractors manufactured after Oct. 25, 1976, which will be operated by farm equipment must be equipped with approved roll-over protective structures.

Fred Holler visited Walker Gaunce on Thursday.

Mr. and Mrs. Emmett Taylor and Mrs. Bertie Kutz and a friend from McKendree visited Mr. and Mrs. Jim Wilson and Mike on Sunday.

YOU

...have a banker who understands farming!

The manager of your local Federal Land Bank Association is here to help you. He's a good person who believes in the agricultural market he serves. He's a friend who talks your language.

Series E Savings Bonds have special insurance

WASHINGTON—As a special Bicentennial commemoration, the Department of the Treasury will issue Series E Savings Bonds lending agents—most commercial banks and many savings and loan associations—to provide over-the-counter purchasers with a special July 4, 1978, validation date for all Bicentennial-design Series E Bonds bought during the month of July.

Each financial institution that issues Series E Bonds over-the-counter may determine whether or not it will participate in this commemoration, and determine which bonds issued during July will be eligible for the July 4, 1978, validation date.

For record-keeping purposes, agents will be required to maintain a record of the exact date of issue for each Bond years they are held.

In announcing the special program, Frank J. Wolf, National Director of the U.S. Savings Bonds Division and Treasurer of the United States, said, "We are extremely pleased to be able to offer all our citizens a chance to make the purchase of Savings Bonds a truly Bicentennial event. Bonds carrying the date of our nation's 200th birthday make marvelous souvenirs—and they will grow in value with the years they are held."

Each financial institution that issues Series E Bonds over-the-counter may determine whether or not it will participate in this commemoration, and determine which bonds issued during July will be eligible for the July 4, 1978, validation date.

For record-keeping purposes, agents will be required to maintain a record of the exact date of issue for each Bond years they are held.

Wine called
'new harvest'
for Kentucky

Hailed by Gov. Julian Carroll as "the new harvest for Kentucky," wine made from grapes grown on reclaimed land in Eastern Kentucky passed its first test at a wine-tasting party in Lexington.

Falcon Coal Company of Lexington is sponsoring production of the grapes and will donate to demonstrate an economic use for reclaimed land after strip-mining of coal.

The mountain-top vineyard that produced the grapes is planted in Breathitt county near Jackson on the site of a former Falcon Coal Company surface mine.

A panel of four nationally and regionally recognized wine ambassadors tasted the wine and judged it to be of good enough quality to support an optimistic view of a wine industry in Kentucky.

OPEN FOR BUSINESS

For several years, Nicholas County has been without a facility to properly take care of your home killed beaver, hogs, and lambs.

This is no longer true. Beginning Monday, June 14, 1978, we have a plant ready for you to process. It is located 2 1/2 miles from the center of Carleisle on Highway 38 or Paris Road. It's between Nicholas County Feeders Supply and Section's Trailer Court on the lot behind the residence of the County Farmer or the road to the Landfill.

At the plant you will receive beef in dressed quarters from ready to go into the chill room; hogs or lambs may be dressed ready for chill room.

If you want to slaughter your animals at home it is in your privilege, or if you would like us to come to your place and do the beef slaughtering, we will be glad to do an appointed time. We will slaughter on your property and prepare the beef for delivery in your truck.

We are prepared to chill, age, cut, package, and freeze in size cuts and packages that you desire for your family. We can also store overruns in boxes in the freezer.

This is the only plant or facility that is licensed and approved by the United States Department of Agriculture in Nicholas County.

Your meat will get the same attention that you want it to have and that you are satisfied with your product. This can be done by the years of experience that I and my personnel have had at processing and retailing of meats.

Yes, we are ready and willing to be of service to you.

Dark Returns

King and Queen

Pictured left to right at the Open House held recently at Johnson-Mathers Nursing Home are: Rev. Herman Kurling, chairman of the board of Matthers Home, Inc., Andy Holland, who was crowned Nursing Home King, Elizabeth Todder, Nursing Home Queen and Little Weathers, reserve King in the competition for crown. Charles Poor (last in the picture) was runner-up for king.

Judicial commission appointed

FRANKFORT—Gov. Julian Carroll has appointed four members to the new Judicial Nominating Commission for the Supreme Court and the Court of Appeals, thus filling out the membership of that commission.

The Kentucky Constitution provides that the Chief Justice of the Supreme Court of Kentucky be the chairman of the seven-member commission, that three members of the Bar elect two members and that the Governor appoint the four remaining members, none of whom are to be members of the Bar.

Named to terms that expire on Jan. 1, 1979 are Bruce Ferguson, of Union and John E. White, of Manchester. Appointed by Gov. Carroll to terms that expire on Jan. 1, 1980 are Frank Paxton of Paducah and L.D. German of Harard.

Kentucky law provides that the terms will hereafter be five four years, that they will be staggered, and that the major political parties share in the staggered terms.

All air conditioners are not created equal.

In an air conditioner, looks may be only skin deep. You can buy one that will cool a specific area for \$30 worth of electricity a summer, or you can buy another that will do the same amount of cooling for \$55 or even \$25 for the summer. Over the life of the unit this can be an expensive savings.

The difference between the units is in their Energy Efficiency Ratios, their EERs. A unit with an EER of 5 will use twice as much electricity to do the same amount of cooling as a unit with an EER of 10.

We recommend an EER of 8 or more. The first cost is less, but the more efficient unit's savings are yours every month, every summer as long as you use it.

Electricity—use it wisely

KENTUCKY UTILITIES COMPANY

If there are no EER tags on the units you're considering look at the name plate on the back of the unit. Find the block that lists "EER" or "the block that lists "Watts/Divide watts into Btu's. The result is EER."

7200 Btu's = 900 w = 8
The unit's EER is 8.
