# School Board approves $9,750 budget for high school library

At the July meeting of the Nicholas County Board of Education held last week, the board decided to approve a budget of $9750 for the high school library. This amount is approximately $2000 more than last year's allotment. The extra money was deemed necessary to keep up on current additions and audio-visual improvements.

## Nation's oilmen set good example

The nation's oilmen have long been aware of the energy crisis that has been hanging over the U.S. like a Damoclean Sword.

They not only have been warning the nation of the impending crisis for years, they also have been setting a good example by substantially reducing consumption of energy in their own operations.

For example, in refineries, which use about 70 per cent of the energy expended by the industry, better maintenance, operational efficiency, and more than $1 billion in capital improvements have resulted in a 13 per cent decrease in energy consumption since 1972.

To cite some instances highlighted in the current issue of Petroleum Today:

—At Suntech's Applied Physics Laboratory in Newton Square, Pa., a 20-year-old building has been made more energy-efficient through redesigned air and lighting systems. Old metallic awnings have been replaced with solar panels which contribute to space and water heating and provide the lab a test-bed for solar energy experiments. Result: The cost to Suntech Physics Lab has cuts its energy use in half, and won the Federal Energy Administration's 1975 Excellence Award.

—The latest available conservation concepts were embodied in plans for Texaco Inc.'s new headquarters building in Westchester County, New York. The building has been located so that the sun's heat and light could best be utilized. As a result of new energy-saving measures involving air conditioning, heating and lighting, the building will consume the energy equivalent of 15,900 barrels of oil a year less than if it had been traditionally designed. Similar plans are scheduled for Continental Oil's new building in Ponca City, Okla. Projections are that the new structure will consume half the energy of existing buildings.

Other examples of oil company energy saving ingenuity abound. In hundreds of refineries, plants and office buildings, the order of the day is to cut energy consumption—reduce lighting, lower thermostats, improve insulation, recycle heat, and take any action necessary to stop energy waste.

As one oilman put it, "We must practice what we preach. One oil truck doing 70 on the highway can obliterate months of effort trying to encourage the public to conserve energy."

In other action, the board:
—Approved the Title I application;
—Approved the salary rates of substitute teachers;
—Approved additional trip salaries for bus drivers;
—Accepted resignation of Donna Workman;
—Employed Miss Anne Skees as an elementary teacher;
—Employed Robert Hawkins to do repair work at the high school;
—Approved extra-duty salaries for coaches;
—Authorized Superintendent, Don Elder, to sign for "application" for determining final payment to Title I of Public Law 81-874;
—Allowed the Farm Bureau the use of the school ground for a meeting;
—Approved a $300 budget for the elementary school's music department;
—Accepted the resignation of Katie Doyle as bus driver;
—Employed Larry McCarty and Phillip Coldiron as bus drivers.

## MAGICWORD

HOW TO PLAY: Redr the list of Words. Look at the puzzle. You'll find these words in all directions — horizontally, vertically, diagonally, backwards. Draw a circle around each letter of a word found in the puzzle then strike it off list. Circling it will show a letter has been used but will leave it visible should it also form part of another word. Find the big words first. When letters of all listed words are circled, you'll have the given number of letters left over. They'll spell out your MAGICWORD.

THE SEASIDE — Sol.: 12 letters

### SLIMMING SEAFOOD

It's fishing time and fresh fish is a great addition to every dieter's daily menu. Fish is healthful, high in protein, and almost always low in calories. To help you fix up this season, 4 catch in style, here are some great diet recipes:

TROUT AU VIN

Clean four rainbow trout (about 5 ounces each), remove head, tail and fins. To one-half cup dry white wine add ½ teaspoon dill seeds, ½ teaspoon rosemary and ½ teaspoon seasoned salt. Poach trout in wine mixture for 15 to 20 minutes, or until done. Cool fish in poaching liquid. Remove the skin and lift meat from bones in one solid piece. Serve each trout separately on crisp lettuce leaves. Add, if desired, 2 tablespoons of the following dressing: In top of double boiler, mix 1½ teaspoons sugar, ½ teaspoons dry mustard, ½ teaspoon salt, 1/8 teaspoon paprika, 1½ teaspoons cornstarch and 1/8 teaspoon onion salt, with slightly beaten egg and ¼ cup buttermilk. Stir until smooth. Cook over hot water until mixture begins to thicken. Add 1 tablespoon melted butter and ¼ cup vinegar gradually, beating well after each addition. Cool before serving. (Trout Au Vin without dressing: 80 calories per serving; dressing: 15 calories per tablespoon.)

FISH PINWHEELS

Skin fillets of 1 pound of fish (sole, perch or pickerel) and slice to make 8 to 10 strips about 6 inches long and 2 inches wide. Season fillets with salt and pepper on both sides. Line greased muffin tins or custard cups with fillets. Preheat oven to 450 degrees F. Combine 2 tablespoons chopped onion, ½ cup chopped cucumber, ½ cup chopped tomato, 2 teaspoons lemon juice, ¼ teaspoon salt, a few grains of coarsely ground pepper, and 1 tablespoon melted butter. Put 2 tablespoons of mixture in center of the fillet rings and bake for 15 minutes. (Makes 4 servings. 130 calories per serving.)

HALIBUT A L'ORANGE

Season 2 pounds fresh halibut steaks (about 1 inch thick) with ½ teaspoon salt and 1/8 teaspoon pepper. Blend juice of ½ orange with 1 tablespoon butter. Cut remaining ½ orange in thin slices. Brush halibut steaks with half the orange butter in a greased broiler pan, 3 or 4 inches from the heat. Broil 5 minutes or until steaks are browned. Turn, brush with remaining orange butter and broil 5 minutes more, or until fish flakes easily when tested with a fork. Garnish with orange slices. (Six servings, 200 calories per serving.)

## OFF THE WALL
