Building a home? remember this letter:

Insulation keeps heat where you want it - inside in winter, outside in summer - "R" - when followed by a number, indicates insulation's resistance to heat flow. The higher the "R" - the greater the value.

After extensive review, guidelines have been compiled to help you help keep energy use for heating and cooling to a minimum.

Stop by our office today for "Insulation Guidelines," a brochure explaining what you should know about insulation. Building a new home? Don't do it without our set of "R's" KENTUCKY UTILITIES COMPANY
