neseso militors:

P.S.: Enclosed you will find a signed check to renew my sister's paper. Please fill in the amount for one year,

To The Cartiale Mercury:

Do you have a picture of the high school which was closed several years ago when the new school was opened? If so I would like to have a copy of the picture as I went to school here in 187-1938 term. If you do have a picture and the school here in 187-1938 term. If you do have a picture and 187-1938 term.

The researcher sand the helpful injects to retinate in the condition of injects. Entomologist Carlo Ignofto, at the Biological Control of Insects Research Unit, Columbia, Mo., says that if practical ways can be found to de-wing the insects, they would be an important aid in controlling crop peats. In one informatory lend, when fivinged Hippodamic convergent a commonly known as individual — were placed in pilots of soybears. The insects responded by statesting eggs of narmful insects. Winged listybugs were used for comparison and field the area. — M-V—
