

Two Homemaker groups meet

The Morefield Homemakers met at the home of Mrs. Joe Smart with Mrs. Everett Smart as co-hostess. Seventeen members answered the roll by telling one thing that you would like to improve about yourself this week. The devotional "Using Our Time" with scripture from Psalm 118:24 was given by Mrs. Hanson Ellington. She read a poem, "At Least I Know Who Made This Day". Mrs. Elkin Clark presided. Mrs. Ellington checked on clothing which had been made, altered or repaired. Mrs. J. S. Wilson, cultural arts chairman gave an article on types of art and checked on books read, etc. Mrs. Jack Becker gave the lesson on "Health Hazards and Personal Decisions". She said the three leading causes of death are heart disease, cancer and auto accidents. Each hazard has precursors — risks that build up or grow gradually with time to become signs, symptoms, crisis and disability or death. Decisions to control the precursors and reduce the

hazards can be made by individuals and families only — not the doctor. The next meeting will be with Mrs. Ollie C. Ramsey at Sharysburg. Members are reminded to bring their Valentine gift for your Christmas Sister. The Headquarters Homemakers met Tuesday, Jan. 9 at the Nicholas County Library with Mrs. Reynolds Allison as hostess. The devotional was given by Mrs. Allison and Mrs. Marjorie Wilson. Six members answered the roll call with, "What I'd like to do to improve myself". The January meeting will be given in February at which time the club members will exchange valentine gifts. Members discussed the family life lesson and Mrs. Wilson told of several meetings to be held. Several ideas were discussed for lessons next year.

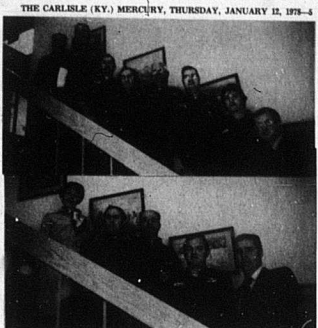

All persons are welcome to attend Homemakers meetings regardless of race, color, or creed. **Jeffery J. Thel, Jr.** by Deception (two counts). Fined \$10.00 for cold checks, \$10.00 fine plus \$2.00 costs.

Marilyn Daniel named Assistant U.S. Attorney

Marilyn Stewart Daniel was sworn in last week as an assistant U. S. Attorney by U. S. District Judge Bernard T. Moyhanan Jr. in Lexington. Mrs. Daniel, 37, a former resident of Carlisle, a Phi Beta Kappa graduate of Southwestern at Memphis and former high school mathematics teacher, had been Moyhanan's law clerk since January 1977. Upon graduation from Southwestern in 1962, the Tulsa, Okla. native studied one year at the Institute for American Universities in Aix-les-Bains, France. She received a Juris Doctor degree from the University of Kentucky College of Law in December 1976 and was admitted to the Kentucky bar the following May. "I anticipate that my time will be divided fairly evenly between civil and criminal matters," Mrs. Daniel said. "Civil matters will probably include non-conviction cases, mining en-

Stamler employees honored Dec. 22

At the eleventh annual Christmas dinner and dance held Thursday evening, Dec. 22, The W. R. Stamler Corporation of Millersburg honored employees for long service, attendance, and safety. Those honored are pictured right to left, (upper photo) William R. Stamler, President, Robert Graves, Ollie Guy, Luther Herrington Jr., Billy Mann, and Lena Thompson. In the middle photo, Mrs. W. R. Stamler presented each with a check for \$100. Second place winner, Harry S. Stanfield, received \$50 and Laddford Curtis, third place, received \$25. (Lower photo) Charles M. Anderson, executive vice president, presented gold "Frederick" pins to Larry S. Jones and Laddford Curtis for fifteen years service. A silver pin was presented to Billy Mann for ten years service, and a bronze pin to Mrs. Jerry Lee Krause for five years.

Kentucky Afield

by John Wilson
Kentucky's bass fishermen got two New Year's presents this year — a new size limit on bass and a new biologist to study their favorite fish. Effective Jan. 1, 1978, the size limit on all black basses in Kentucky runs from 10 inches to 12 inches. This is a move that has the support of most bass clubs throughout the state, the League of Kentucky Sportsmen and the Department of Fish and Wildlife Resources. The Division of Fisheries has added to its staff a research biologist who will concentrate on black bass. Filling this new position is Ted Crowell, who has been with the fisheries division since 1974, most recently as a district biologist stationed in Morehead and who is himself an active and avid bass fisherman. Mr. Crowell assumed his new duties January 1.

Mr. Crowell will be in charge of measuring changes in bass populations, growth, and catch rates around Kentucky, with his findings forming the basis for future bass management. Another part of his job will be to determine the effectiveness of current renewal stocking programs and to evaluate the success of balancing fish populations by such stocking. Mr. Crowell's research in these areas may lead him in other directions of inquiry, but his primary duty will still be to determine ways to best manage the commonwealth's bass fishery. With the increasing popularity of bass fishing, biologists feel that more intensive management is now necessary and will become even more important if fishing pressures continue to increase.

The fisheries division has made several other changes recently. Two new fishery districts have been created (bringing the total to seven) and a research biologist is now devoting all his efforts to studying the Ohio River, the new fishery district, one in Eastern Kentucky and the other in the western part of the state (the Owensboro-Henderson area). The other five districts have been reduced in size as a biologist is little less territory to cover. These district biologists are more involved in the direct management of the fishery resources in their districts than with pure research. They are

Peter Conn stops radioactive burial at Maxey Flats

FRANKFORT — Human Resources Secretary Peter Conn announced yesterday that he is banning an order prohibiting the burial of any new radioactive material at the Maxey Flats nuclear waste disposal site in Fleming County. Mr. Conn and Finance Secretary Russell McClure said at a joint news conference that a proposed agreement with Nuclear Engineering Company, Inc. (NECO), which operates Maxey Flats, will not go into effect.

Instead, the Department for Human Resources, which licenses operation of Maxey Flats, will use its licensing powers to prevent the burial of further radioactive waste deposits at the site and to conduct tests to determine the long-term use and safety of Maxey Flats. The joint decision announced today will have the effect of requiring NECO to continue financing cleanup operations at Maxey Flats, for which the company is currently responsible. The problem of contaminated surface water in trenches at Maxey Flats was first identified in 1975, and NECO has been trying unsuccessfully to eliminate the problem.

Mr. Conn also announced that he is assigning an inspector to Maxey Flats on a full-time basis for 90 days, beginning Dec. 26. The inspector will oversee NECO's cleanup operations and its compliance with licensing regulations. The need for a full-time inspector will be evaluated at the end of 90 days, Mr. Conn said. Mr. Conn said that burial of any new radioactive waste at Maxey Flats, other than those involved in cleanup operations on the site, will be prohibited until studies are made of the hydrology and geology of the site, to determine if additional material can be buried available to offer technical guidance to pond owners as well as to recommend and carry out management on larger bodies of water.

A research biologist has been assigned to the Ohio River because of the future potential of this body of water, by far the largest in the state. The Ohio River is becoming "cleaner" again and is now capable of supporting good populations of game fish. The 60-plus miles of the Ohio which belongs to Kentucky offers enormous opportunity for anglers and its importance will very likely increase as the number of fishermen keeps growing at anything like its present rate.

Mr. Conn indicated that Mr. McClure, in the negotiator, looked at the Maxey Flats situation from the standpoint of the region, and from that perspective the agreement developed was probably the best one that could be obtained with the concurrence of all parties. Mr. Conn said it would have been preferable to have reached a negotiated agreement. However, Mr. Conn said that he looked at the matter from the licensing viewpoint and determined that action regarding the license was the most appropriate course of action at this time.

—Not only NECO at Louisville but the state will not enter into the proposed agreement. —Prohibit the burial of any additional radioactive material at Maxey Flats except that generated as a result of the site cleanup. NECO's license will be amended with this provision. —Conduct studies of the hydrology and geology of Maxey Flats to determine whether additional radioactive waste materials can be buried there without risk to public safety. —Hazardous officials in The Department of Human Resources may be the assistance of water in the trenches represents a potential for the release of contaminated water into the environment. The trench water must be pumped, the removed contaminated water processed, and the residue from this processing reburied. —Hazardous officials also contend that the site should be sealed. Leakage of radioactive waste from an old trench to a new trench, that occurred in 1975, had happened if there had not been water in the trenches.

William D. Crawford
Mr. Crawford elected to U.S. Presbyterian Mission Board

William D. (Billy Dale) Crawford, a native of Carlisle, has been elected Coordinator of Interpretation for the General Assembly Mission Board of the Presbyterian Church in the United States. He will begin work at the denomination's headquarters in Atlanta on Jan. 21. Mr. Crawford has served since 1973 as an Associate for Communication for the Synod of the Covenant, United Presbyterian Church in the USA, which includes Presbyterian churches in Kentucky, Michigan and Ohio. Since 1976, he also has provided communication services to the Synod of the Mid-South, which encompasses "southern" Presbyterian churches in Kentucky, Alabama, Tennessee and Mississippi. In his new position, Mr. Crawford will be responsible for developing and implementing coordinated plans for interpreting to the church and the general public the work of the General Assembly Mission Board as it is carried out in the United States and around the world. Mr. Crawford was called to a career with the church in 1972, after spending more than 20 years in the broadcast industry, including three years with WLEX-TV in Lexington. Mr. Crawford is the son of Samuel (Alex) Crawford of Carlisle and was graduated from Carlisle High School in 1950.

Emily Wolf named as vice pres. of CSNI

Emily Astory Wolf has been named vice-president and a member of the board of directors of the Cincinnati Suburban Newspapers, Inc. (CSNI). She joins president and publisher John H. Wolf and vice-president and general manager William H. Over on the board. A native of Carlisle, the new vice-president began her newspaper career here in 1948 with the Carlisle Mercury. She came to CSNI in Oct. 1966, from Louisville where she was editor of the Jefferson Reporter for 11 years. The Reporter was named the Kentucky Press-As. — three times during her editorship. Mrs. Wolf will continue as assistant to the publisher with CSNI, with editorial and production responsibilities.

She is listed in Marquis' "Who's Who of American Women" "Who's Who in the Midwest" and "Who's Who in Business and Commerce". The newly-appointed vice-president has her residence in Mt. Lookout and in Carlisle. Her mother, Mrs. Heil Astory, lives on Chestnut St. in Carlisle.

freedom of the press is one of the great bulwarks of liberty and can never be restrained but by despotic governments." —George Mason
