

Kentucky Afield

It won't be long until Kentucky's hunting season gets into full swing. With the number of different species and the number of different species, it's sometimes hard to keep track of everything.

So here's a rundown of opening and closing dates for this year's hunting season, courtesy of the Kentucky Department of Fish and Wildlife Resources.

BOBWHITE: Opened Aug. 19, will close Nov. 11, 1978.

GREASE, RAILS & GALLINULES: Opened Nov. 12 and continues through Dec. 31.

WOODCOCK AND SNIPES: Opened Oct. 6, will close Nov. 30, 1978.

FALCONRY: Again this year there is a special "early season" for those who hunt with hawks. This falconry season will open Nov. 1 and will continue through the regular open season for the species listed.

Remember that the dates given above are for the statewide seasons. Certain wildlife management areas may have different dates or other special regulations, particularly for deer or waterfowl hunting.

For a complete rundown of this year's regulations or for a list of public hunting lands, write the Department of Fish and Wildlife Resources, Division of Public Relations, 601 East Main Street, Frankfort, Kentucky 40601.

sports watch

Who's on first? Nicholas County's primary opponent Nov. 10 will be:

(a) Beechwood
(b) Believe
(c) Dayton
(d) None of the above

If you answered (e), then you're as right as anyone can be at this stage of the game. Although the Bluejackets have clinched their district, the northern Kentucky district that will need an opponent due to a bye week from Friday is in a mare's nest of possibilities and a final decision may be reached by a calculator — or by the Bluejackets themselves.

Beechwood is currently on top of the district with a 2-1 mark. Believe, Dayton and Ludlow follow with 1-1 district records. For all practical purposes Ludlow is out; it leaves the two 1's and upstart Dayton. Dayton needs Believe. Friday, in another David-Goliath confrontation, Dayton has already downed Beechwood. This season and a win over Believe might give the Ohio River town its first district win in several years — but Jeanette and Dayton in a deadlock under the Dickson System. If this happens then the KHSAA powers that would revert to the Alabama system. (That doesn't mean the two teams would have to go to Alabama to play. It's just another complicated formula used when the more complicated formula doesn't work.)

Under the Alabama system each team picks four of their opponents that they have defeated during the season and adds up their victories, a procedure designed to denote toughness of competition.

With seven and a possible eighth victories Nicholas would surely be chosen by Beechwood and Believe. To complicate things further, if Dayton beats Believe, then it might be to the Jackets' advantage to lose against Fleming to give Dayton a boost and rob the two 1's of an opponent that has won eight games.

Of course, the Jackets won't be making the field Friday to lose against Fleming. It's homecoming and all that and a loss to Fleming would mean a state championship. But it just goes to show how complicated the system is. Come to think of it, it's a lot like life: sometimes even if you win, you lose, and that's why your opponent will be Nov. 10: it's a good bet the Jackets will be ready to play. If it's Beechwood or Believe there are some scores to settle. If it's Dayton, then it's Dayton that will stand in the way of a trip east to continue the trail toward a state crown.

Here comes Bobby

Speaking of Fleming County, Friday night the Jacks team will have a chance to see if Bobby Lewis is for real.

Lewis, the Panthers' premier running back, is generating a lot of buzz this year, compared to the Who-Are-Those-Guys? Nicholas fields that seem to enjoy teamwork and a chance for a state title more than individual stats.

But one of my Fleming County scouts tells me this about Lewis: He's quiet, preferring to let his work do his talking; he's a sophomore and the leading scorer in the state with 31 TD's, he's 5'10", 160 pounds and fairly fast; he doesn't gain much rushing yardage in the first half than the other team does in a game, and he was covered by three or four Howard County defenders Friday night but still scored three touchdowns in Fleming's 37-21 win.

Should be an interesting game. Can Nicholas County's Big D stop Fleming's Big B? Tune in Friday night to see.

WUK plans scrimmages

The 1978 NCAA champion, Kentucky Wildcats will play three in-state public scrimmages next month, head coach Tom Williams today announced.

The Wildcats are scheduled at Boyle County High School at Danville, Nov. 15; Shelby County High School at Shelbyville, Nov. 20 and at Ballist Central High School at Shepherdsville, Nov. 22.

This marks the fifth year Ballist has taken the Wildcats into surrounding communities that lie within the NCAA limit of 100 miles of Lexington. And it has proved a bonanza to each of the charitable sponsoring organizations with student crowds at each stop. The Wildcats enjoy the exposure and the house crowds love it.

Ballist will be primed for the Nov. 22 scrimmage at Shepherdsville for it was some 22 years ago that he entered the coaching profession at Shepherdsville High School, which since has been consolidated into Ballist Central.

The Wildcats have completed two weeks practice and are progressing "on schedule" according to Ballist.

"We have worked an awful lot fundamentally. This is an inexperienced ball club, especially on the front line where we have had to spend a lot of time in teaching situations. Our frustration is very heavy in us this year. Our one guard (Dwight Anderson) and

Swann "Bubs" Callahan, 6'11" center for the AD-American Red Hawks, tops a roster of all-star women basketballers that will meet a local team composed of "school faculty" and "outside players." Scrimmages like these might be some regulars involved. Action begins at 7 p.m. Nov. 4 (Saturday) at the Little League game on a list of public hunting lands, write the Department of Fish and Wildlife Resources, Division of Public Relations, 601 East Main Street, Frankfort, Kentucky 40601.

Maxey Flats' radiation leaks, cost questioned

Meetings of two subcommittees on movement of the nuclear waste disposal site at Maxey Flats have seen many questions raised and a few answers given, and members of the subcommittees are expressing frustration.

The Wednesday meeting of the Subcommittee on Site Status and Improvement of the Special Advisory Committee on Radioactive Waste ended with new committee member Hugh Spencer, of the department of chemical and environmental engineering in the University of Louisville's Speed Scientific School, asking for a statement of the objective of maintaining the site.

"The objectives seem, I hate to say political, but are rooted in confusion," Spencer said.

Subcommittee Chairman Douglas Hunt, a professor at Western Kentucky University, agreed that the question of objective was an appropriate one and should be put to the Department for Human Resources and Department of Finance at the next meeting of the special advisory committee.

At the Tuesday meeting of the Subcommittee on Costs and Financing, members learned that projections of the long-term cost of maintaining the site have been altered by the state's closing the facility last December.

Lawrence Lynch, economic consultant for the Council of Economic Advisors, told the subcommittee that a 1977 study which found that a perpetual care fund of \$3.2 million to \$4.2 million would be necessary to generate enough

yearly interest for upkeep, is no longer accurate because it was based on assumptions that the site would be operated by a private firm through 1990.

Nuclear Engineering Co. (NEC) has been managing the site near Morehead until its closing by the state after reports of small quantities of escaping radioactivity.

The site improvement subcommittee also expressed a need for clarification of the division of responsibilities at the site. NEC currently maintains the site, the Department of Finance pays for its maintenance and the Department for Human Resources regulates the operation.

"What concerns me is who's going to be responsible for the site two or three years from now," said Humphrey.

A continuing problem for those working with the nuclear waste disposal question is the proper handling of complaints from Maxey Flats residents, according to Marjorie Denton, a member of the site status and improvement subcommittee. Denton had the complaint that John Hay, head of the Maxey Flats Radiation Protection Society, has asked for radiation tests on a woman who lived near the site and who now has cancer.

Denton said Hay had asked her to discuss with the subcommittee two and several other instances of cancer among local residents who lived near the site.

Hay also asked that the subcommittee look at a local farmer's complaint that some of his cows may have skin

cancer. The subcommittee agreed to ask a veterinarian from the state diagnostic laboratory in Lexington to inspect the cattle.

The farmer came before the Special Advisory Committee on Nuclear Waste Disposal over a year ago with a similar problem. His herd was subsequently diagnosed as suffering from a copper deficiency.

At Tuesday's meeting on costs and financing, Rep. Tom Warrington (D-Ewing) said, "When you go up a mountain in Eastern Kentucky and dig a hole and pour this stuff in there, you're making a big mistake, and people are beginning to realize that."

THE CARING CORNER
"But through love be servants of one another." (Galatians 5:13)

WHAT ARE YOU DOING!!!
She screamed with a look that shook the devil himself.

"I'm just cleaning out this messy closet. I thought since I had some free time I would be helpful and clean out some of these items that need to be thrown away," I said as I shrugged my shoulders in a plea of innocence.

"I was saving a lot of those things because we may be needing them sometime," and she commenced to go through most of it and tossed the majority of them back into the closet. Gloomy clouds began hovering over my head as I mumbled to myself in frustration.

Why is it that when we get in a real helpful mood (supposedly) we usually pick the wrong time to help. Instead of receiving praise and a word of thanks... the walls cave in on us.

We know that God wants us to be helpful for the rewards are great, but we often need to ask Him when would be the best time to help someone. We need to combine our helpful agreement with His wise timing in order to achieve the best results.

Be eager to serve... but patient-as to when.

Join us this Sunday in caring.

Montgomery Ward opens local store

Carlisle's newest business, a Montgomery Ward catalogue store, is having its grand opening today (Thursday) at the store's location, 102 W. Main on the corner of Main and Locust.

The store will be operated by owners Julian and Betty Hunt of Ewing and employees will include Debbie (Mrs. Ike) Franco of Carlisle. The Hunt's son, Jerry, and his wife, Carol, also of Carlisle, will be assisting in the store's operation.

Opening ceremonies will include a ribbon-cutting at which County Judge/Executive Reese Smoot will attend along with several executives from the Montgomery Ward home office in Chicago.

Refurbishments will be served and said.
