RP FORAGES

The difference between luck and science.

Put your trust in science and not luck by planting genetically superior RP Forages - Research Proved varieties that improve your chances for getting more meat-and-milk-making force.

VANGARD variety alfalfa* resists both wilt and anthracose for top production wherever hot, humid growing conditions threaten summer decline. Leafhopper yellowing tolerance. Topped all varieties in a 7-78 U.K. trial.

APOLLO variety alfalfa* resists Phythophora root rot (wet foot disease); greater yield potential, less damage from wilt, pea aphids and leafhoppers than other major varieties. Second only to Vanguard in a 7-78 U.K. trial.

REDLAND variety red clover* has greater disease resistance and persistence, for unparalleled extra-season yield potential - up to 40% more than Kenland and Medium. Ideal for grass pasture renovation in Kentucky.

NAPIER variety orchard grass is later maturing, drought tolerant, for lush grazing straight or in mixtures. Winterhardy; resists leaf disease. Ideal companion with Vanguard Alfalfa.

TORO variety timothy combines extra leafiness and disease resistance with early maturity and quick recovery, for top yields further south than most other timothy varieties. Better than Clair. Ideal companion with Apollo Alfalfa or Redland Clover.

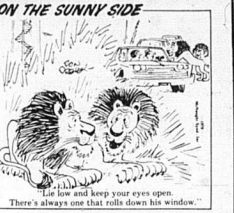

RP Seeds are bred and developed by North American Plant Breeders, Missisquoi, Que. Canada

Distributed by Louisville Seed Co. Available now at:
