Blue Licks' future

They happen to think that the development of Blue Licks will stand on its own merits. There has been too many instances in the past where an area was neglected because a politician threw the gravy to his home area. We do not condone nor wish to perpetuate this philosophy. The surest way to kill development in Blue Licks is to reject politics into it. The sooner that is realized the better. Blue Licks development does not mean votes; it means a better future for this area and a better understanding of the past. That is what is needed.

Rate hikes denied

Denied a requested return on revenue of 14.6 per cent and granted an 11.9 per cent return on equity. In denying Columbia's request, the commission rejected the proposed 19,092.74 residential increase. But the commission did grant commercial and industrial customers approximately 6 per cent income over existing rates.
