

EKU starts nursing

Eastern Kentucky University is raising the status of its nursing instruction by establishing a School of Nursing within the College of Allied Health and Nursing.

The new School consists of two departments in the College: Associate Degree Nursing and Bachelor's Degree Nursing. The latter recently won accreditation by the National League for Nursing Education.

The new status for nursing education was approved by the Board of Regents after EKVU president, Dr. J. C. Newell, said it "will provide for a more efficient and effective administrative structure for programs that produce more than 10 per cent of our undergraduate degrees."

He said the proposal for the School resulted from a study by the College that indicated the two nursing departments have grown large enough to benefit by being combined into one school.

Nursing education began at Eastern in 1969 with 25 students in an associate degree program.

Other units in the College include the Health, Behavior, and Science Department, Occupational Therapy Department, Emergency Medical College Program, Medical Assisting Program, Medical Technology Program, and Environmental Health Department.

Jobsless rate down

Statistics released recently by the Department for Human Resources indicate unemployed Kentuckians numbered 82,700 in March, down from the 100,100 without jobs in February.

The state's unemployment rate for March was 5.5 per cent, lower than the 6.1 per cent national unemployment rate for the same month. The February unemployment rate in Kentucky was 6.7 per cent.

"The decrease in unemployment in the state reflects increased hiring in the construction, trade and service industries," said Robert MacDonald, chief labor market analyst for the Human Resources Department.

The total number of Kentuckians working in March was 1,425,000. That number is 12,700 or 0.9 per cent more people working than during March 1978.

Compared with March of last year, there were 7,900 fewer persons unemployed in Kentucky this March, and the unemployment rate was 0.4 per cent lower.

Happy Mother's Day
For that someone special...
BAKER'S

Clock set

It takes 30,000 plants, six crew members and 10 hours to plant a new design in the floral clock that graces the capitol grounds. The clock undergoes a facelift two times each year — just prior to Christmas and in the height of the Derby season. The clock's Derby design was completed last week by members of the lawn and landscaping section, division of physical plant, Department of Finance. In addition, 65,000 Holland hybrid tulips are planted on the grounds of the capitol, the governor's mansion, Capital Plaza and the governor's mansion in celebration of Kentucky's famous horse race. Two Derby events took place in Frankfort — the Governor's Cup Cycle Race, held the week before the Derby, and the Governor's Derby Breakfast on Derby morning — State photo.

Crystalline acid explosive

Your Vote & Influence Appreciated

State Fire Marshal Bob G. Estep issued a warning to Kentuckians to be alert to the dangers of picric acid, a chemical that is highly explosive in crystalline form.

"Picric acid is usually a liquid found in school laboratories, hospitals, animal hospitals, tanneries and metal fabrication facilities, but it can be found anywhere. And therein lies the danger," Estep said.

In the crystalline form, it is unstable, highly explosive, poisonous and shock-sensitive. "It will explode if jarred only slightly," Estep said.

Picric acid is found primarily in glass bottles or cans, but it also may be in other types of containers. It is used as a preservative, an antiseptic and in dyeing and tanning processes.

"In its liquid form it is not explosive, but when it has been allowed to a period of time it has a tendency to crystallize. That's when it takes on the explosive characteristics of nitroderivatives," Estep explained.

Estep warned that persons finding any yellow, crystalline substance should immediately notify the State Fire Marshal's Office at (502) 564-0326 between 8 a.m. and 4:30 p.m., and Kentucky State Police Headquarters in Frankfort at (502) 566-5779 at other times. "Under no circumstances should the chemical be moved, or even touched," he said.
