Kranepool Treated With No Respect

First baseman Ed Kranepool, the only player with the New York Mets in each of their 17 seasons, last he has played his last game at Shea stadium and it says that management let it pass without even a moment's Kranepool, 34, has played out his option. He's completed a 3-year \$300,000 contract and wants two more years at \$150,000 per season. The Mets have balked at his salary demand, however. The Mets completed their regular season play. "And I didn't even get a plaque," Kranepool complained. "I am disappointed in the way I've been treated. If someone had given that much money to me for 17 years, I'd treat them better. They're not even knowing how to respect a person. If they want me to retire, they could do it easier and nicer." Kranepool was annoyed because the Mets honored all-time home-stealing king Lou Brock of the St. Louis Cardinals in his final New York appearance but chose to overlook the veteran first baseman.

"I want to finish my career here," Kranepool said. "I would hope never to go into the free-agent market, but they are trying to force me. Why didn't they give me a going-away present?"

George Bernard Shaw, the famous British playwright, was a vegetarian.

**'79-80 basketball 'Cats previewed**

UK assistant coach Dickie Parsons has recorded his impression of this year's Wildcats following a six-week training program. UK begins its season Nov. 17 against Duke in the Hall of Fame game at Springfield, Mass.

**Seniors**  
**KYLE MACY** — Kyle is stronger than I've ever seen him. He's improved most in upper body strength. I've never seen an individual as dedicated. He has a purpose in mind and knows what he must do to gain an edge and to improve. I think he has become a No. 1 draft choice (NBA Phoenix Suns) primarily through his undecaying willingness to work in the conditioning program. Wherever he goes to UK, he won't skimp, but he's not skinny anymore. Shows good strength in his legs and upper body and is up to 188. He has shown a lot of leadership ability.

**JAY SHIDLER** — Jay has had the best pre-season workout since he's been at Kentucky. He has not been injured. He has been doing everything we have asked him to do. He is very strong, has real good leg strength and it seems his stamina and endurance are much better than it ever been so that is definitely a plus and we are pleased with his progress. He's been a tough worker and leader this fall.

**LaVON WILLIAMS** — LaVon has increased his strength and is up to 220 this year. LaVon has been our enforcer, a quiet team leader from whom we all draw a little strength from watching him work. really a hard worker.

**FRED COWAN** — After a summer operation, Fred has surprised us with his strength. He and Ford are the two strongest players on the squad, but Fred has awful good form and technique that enables him to move heavier weight than those with bad form. We felt he needed a couple years to mature and now he is going to be a mainstay for us. He is up to 210 lbs. and we look for him to be better than he is now.

**CHRIS GETTLINGER** — Chris has been steady since he's been here. He and Shidler are a lot alike in body build. In his last workout, Chris did clean 235, which indicates his strength. He is an extremely hard worker and just a super individual to have on your team.

**Sophomores**  
**DWIGHT ANDERSON** — Dwight shows tremendous strength in his legs, which surprises us. He is completely healed from his broken wrist, but that has hampered him somewhat in improving his upper body strength. We have substituted some nautilus work for him and he has not worked as much with free weight. As for running, he runs with ease and is one of the faster individuals on the squad. I would say he, Minnifield and Williams show great strength, stamina, and quickness in running. I would like to see them perform in track just out of curiosity.

**CHUCK YENDERKER** — When he came to us last year, he was not very strong and it seems just in the last week, he's been able to make some giant strides. Of course, now he is in great condition, he's been running all of the 220's and seems to run them with much more ease than he did last year. He has made as much improvement as any player on the squad.

**BOLANTER** — He spent a lot of time this summer in the weight room and he has been one of our overall leaders in strength this fall. has good dedication and determination.

**Freshmen**  
**DERRICK HORD** — Derrick is one of two leaders in overall strength, which comes about because he is such a gifted athlete. His timing, flexibility and coordination are such that he is able to move a tremendous amount of weight. Derrick has already made an impact on our program.

**CHARLES HURT** — Charles is extremely strong. His technique maybe is not as good as his timing at this point, but he is a hard and willing worker who will be there when we need him.

**SAM BOWIE** — We're really going to have to rely on Bowie in the middle at forward this year and I'm quite proud of the progress he has made. He's gained some 20 lbs. since summer and he's up to 219 and looking fine. His problem will be lack of stamina and endurance. We have found that after a hard workout for an extended period, he needs recovery time. We don't feel he can play 40 minutes at this point and we don't expect him to play 40 minutes, but we know he needs more strength and weight. I think another two years of continued work and he will naturally fill out and become a stronger individual.

**TOM HETZ** — Tom has had some injury problems so far. A back muscle, a thigh injury and a foot injury but he has made gains. He's a hard worker who we think is going to be taller and heavier. He's a rugged player inside and he's made good progress although the injuries have slowed his ability to move along quickly.

**DINK MINNIFIELD** — A well rounded, gifted athlete who and quickness were such that it is hampering him moving a heavy weight, but he is a type individual who makes adjustments and finds ways to better himself.
