It's a good thing that Bracken County sheriff who chased that dude from Brooksville to Millersburg wasn't heading the other way when he was hitting 125 mph on 68 couple of weeks ago.

If he'd hit that double-dip at 125 he wouldn't have come down until Friday. And try it at 55 on a bike. Unless you stand up on the footpads when you hit it you might come out a couple of inches shorter from the compression.

I admit it's a cheap thrill but if I call I can afford these days.

Break the camera There are several people in town who are no doubt expecting to see their picture in this week's paper because I took it last week.

Unfortunately it doesn't always work that way. All of you who said, "Oh, no we'll break the camera" were partially right. As the Swedish chef said in the Muppet Movie, "De film de flippety-flip" which means the picture of talkie over. There was a partial separation of film from the cassette it was in, resulting in death by exposure when the camera was opened.
